

# Toilet Movers - moving and cleaning portable toilets

## Portable toilet moving... made easy

These purpose built, UK-manufactured **portable toilet movers** are the ideal solution for safely moving single portable toilets around your depot, on site or at events.

They allow the operator to manoeuvre or position toilets - and gain access to those hard to clean areas like the top of the roof - while lowering the risk of injury.

The toilet mover easily supports the toilet weight, a huge improvement compared with just pushing or dragging toilets across a site or when offloading from a vehicle.

Operators will also reduce the stress, wear and tear on the toilets: rather than being dragged they will be lifted from underneath - supporting both flush tank and pallet.

## Features

- Twin axles and four robust wheels for complete control and rotation when manoeuvring a portable toilet
- Multiple handles to suit operators - regardless of height
- Folding "toe plate" allowing for easy storage in a warehouse or on the back of a vehicle
- Puncture proof tyres. Powder-coated steel frame
- Creates perfect angle for cleaning roof and base of toilet
- Available in medium and heavy duty variants

## Technical Data\* *Medium duty with fixed wheels(MD)* *Heavy duty with swivel wheels (HD)*

Dimensions in Use: (MD) **1100 h x 880 w x 1700 d (mm)**

Folded Dimensions: (MD) **1800 h x 880 w x 600 d (mm)**

Product Weight: (MD) **32Kg**

Load Capacity: (MD) **100Kg**

Dimensions in Use: (HD) **1200 h x 790 w x 2010 d (mm)**

Folded Dimensions: (HD) **2010 h x 790 w x 600 d (mm)**

Product Weight: (HD) **38Kg**

Load Capacity: (HD) **100Kg**

Load capacity is based on operator safety rather than actual capacity

# Toilet Movers - in action

## How to use - in all applications

**Step 1**

Position the unit's toe / forks underneath the toilet

**Step 2**

Hold handles securely and step on the rear bar

**Step 3**

Pull backwards until toilet weight transfers...

**Step 4**

...onto the frame and then the first two wheels. Keep pulling...

**Step 5**

...until the weight of the toilet transfers to all four wheels

**Step 6**

Move...and this position also allows you to jet wash the roof

**Four wheels**

Four wheels.  
Puncture-proof tyres.

**Multiple toilets**

Used with single plastic portable toilets

**Move and clean**

Extra feature: allows roof and base to be cleaned by jet washer
