

# BEYOND WEIGHT LOSS:

## THE METABOLIC REVOLUTION IN MEDICINE

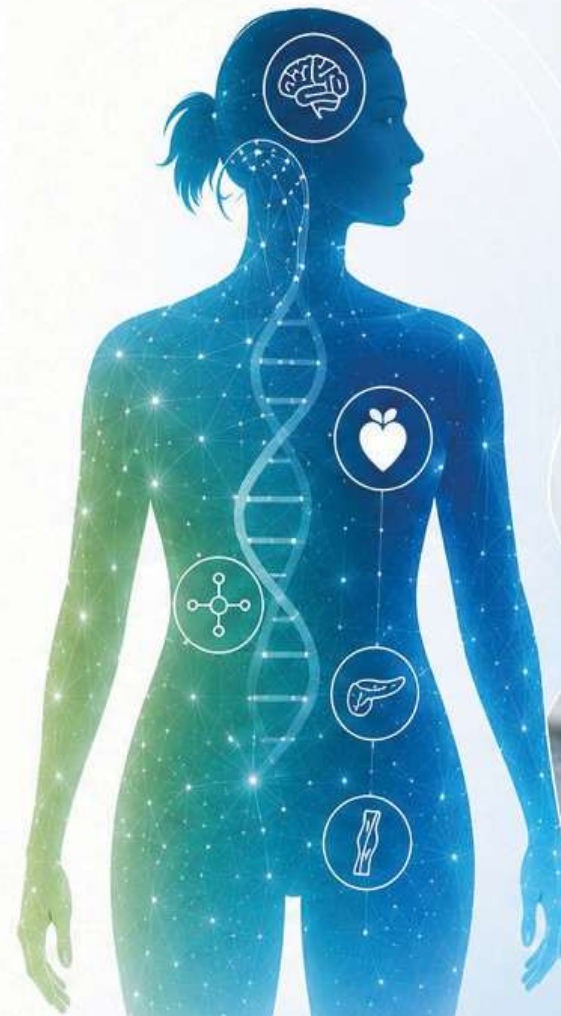

### Have you ever wondered...

Who should be treated for metabolic health – and how?  
How do you know if you're metabolically healthy, or not?  
What are peptides? Why are people talking about them?  
Do I need to see a doctor, or can I get what I need at a medi-spa or online?  
There's so much conflicting advice about diet. What am I supposed to eat?  
What's the best type of exercise for weight loss?

**Beyond Weight Loss will address these questions and more, putting the spotlight on our top weight loss and metabolic health experts to provide answers backed by facts and the latest medical advances.**

This educational program is designed primarily for healthcare professionals. Members of the public with an interest in the subject are also welcome to register and attend. IPCE credit is available only to eligible healthcare professionals in accordance with accreditation requirements.
