

America Makes

The National Additive Manufacturing Innovation Institute

Government Collaboration with America Makes

Engaging America Makes Membership through Cooperative Agreement 3 (CA3)

America Makes convenes government, industry, academia, the workforce, and economic development organizations to accelerate additive manufacturing (AM) adoption and support global U.S. manufacturing competitiveness

ADVANCING THE TECHNOLOGY

- **Drive** member-informed roadmaps and highlight opportunity areas
- **Identify** requirements and funding opportunities to fill gaps
- **Maximize** investment value through dedicated program management
- **Disseminate** results to the broadest available audience while adhering to government-directed OPSEC and Intellectual Property procedures

GROWING THE 3D WORKFORCE

- **Educate** and grow the AM workforce to ensure a resilient industrial base
- **Develop** industry/defense-accepted credentials and standards
- **Work** to ensure both the warfighter and the private sector industrial workforce have professionals capable and ready
- **Lay** the foundation for a sustainable AM industrial sector

EXPANDING THE INDUSTRIAL BASE

- **Grow** awareness, collaboration, and adoption of AM across the U.S. by working with regional, state, and national stakeholders
- **Mature** the strength and size of the AM industrial base to promote U.S. competitiveness
- **Develop** strategic partnerships through education and awareness
- **Ensure** government access to key technologies by branching into additional manufacturing and technology sectors
