GOODS INSPECTION DURING PRODUCTION

Our clients make sure that they have delivered the best quality goods. Our inspectors check out

- Real status of production
- Ability of supplier for delivering goods
- Compliance of the products
- Acceptability of the workmanship
- Success of the products in the functionality tests

Our inspectors inspect the goods physically and also choose a sample of those goods with the use of the statistical process. Every inspection procedure is different as we customize our checklists to make out the things, important to our clients.

PRE-PRODUCTION CHECKING

After identifying and evaluating the vendor, we do this inspection. This helps our clients to know the risks, related to product quality. Prior to starting the process of manufacturing, we consider this step for the verification of the supplier. Our inspectors also visit the site of production to assess the products and its components. In addition to it, we check out the availability of the resources, machinery and other facilities in the factory.

INSPECTION DURING PRE-SHIPMENT PERIOD

Prior to shipping the goods, we help our clients for checking the compliance. We check out if all the products have passed in the tests.
