

NUTSHELL GRANULES

PRODUCT CHARACTERISTICS

Nutshell granules belong to very hard, light, natural abrasives. Grits are made of the crushed, cleaned and sieved walnut shells. Walnut shells belong to reusable abrasive and feature low impact on the air-blasted surface without damaging underlying material. Nutshell granules are 100% natural product and they are free of respirable crystalline silica (SiO_2).

APPLICATION

Nutshell granules are used for cleaning, stripping, deburring of moulds in rubber industry, aeroplane bodies form layers of paint coatings, cleaning turbines and automotive parts, removing graffiti. They are used in soft abrasive blasting and polishing aluminium, jewellery, fittings, composites, electric motors, plastic, stainless steel and architectural cleaning and restoration of wood, brick, stone or concrete.

SPECIFICATION

Sharp-edged shape
MOH'S hardness 2,5 - 3,5
Specific gravity 1,0 - 1,2 g/cm³
Bulk density approx. 0,7 g/cm³
Packaging: 20/25 kg bags

AVAILABLE SIZES

100 - 250 µm	1300 - 1700 µm
200 - 450 µm	1700 - 2400 µm
450 - 800 µm	2400 - 4000 µm
450 - 1000 µm	4000 - 6000 µm
800 - 1300 µm	4000 - 8000 µm
1000 - 1500 µm	6000 - 10 000 µm
1000 - 1700 µm
