

Pastor HJ Sean Moon at the 7th Annual Rod of Iron Freedom Festival October 2025

Pastor Regis Hanna

Good morning. It is my high honor to be able to introduce our next speaker. Two brothers have been behind the vision for the Rod of Iron Freedom Festival from the very beginning. Their father, the Reverend Sun Myung Moon, was imprisoned in a communist death camp in North Korea because he went there to preach the Gospel. General MacArthur had initiated the daring Inchon invasion, and as a result of that, on October 14th, 1951, Reverend Moon was liberated from prison the very night before he was due to be executed. He went from there to South Korea and during his lifetime, he established the largest chain of anti-communist churches in the world, in over 200 countries.

Not only that; he founded the Washington Times, which as many of you know, really started the alternative media from the conservative side. Rush Limbaugh frequently consulted it and talked about it, and Alex Jones also used it as a source of material for InfoWars. Because of this, Sean and Justin, along with their father, have always felt a strong sense of gratitude to all our amazing servicemen and women for their sacrifices, because as a result of that, their father was saved.

They always want to honor our veterans for their service and appreciate their sacrifices to ensure that our precious liberty here in America is protected from those who feel threatened by free men and women. Reverend Moon inspired them through what he called the Peace Police and Peace Militia philosophy, which is a practical application of Jesus' admonition, "No greater love hath any man than he lay down his life for his friends." We have to protect our neighbors. We have to be prepared to protect our

neighbors. The precious Second Amendment that we have, allows us to do that. There's no other country in the world that has enshrined that in their constitution.

Pastor Sean regrets that he could not personally be here to deliver his message in person, but he has felt a very strong call to be ready and prepared for the coming downfall of the Communist Party in China. (Applause) So please let our warm applause be so abundant that even in Yilan County, Taiwan, Pastor Sean can feel the warmth of our reception for him. (Applause)

Pastor HJ Sean Moon

Good morning, folks. Pastor Sean, a . k . a. King Bullethead here, reporting to you from the Far East, China and Taiwan cultural world sphere. God has called us to spread the Gospel and to preach the good news of the kingdom of God to this part of the world. And we have picked up and moved our family, that is our couple. All the kids are grown and married, praise the Lord. But our couple has now moved here to this part of the world, praying for the downfall of the socialist, communist, and political satanist institutions that keep the 1 .4 billion oppressed people under tyranny and oppression. We are now on the ground here on the front line of this spiritual battle. And due to the great victory of the patriots and the election of President Trump, which was an absolute miracle in and of itself, God has called us to come to this part of the world.

We are not there with you in person, but we are grateful, number one, to all the patriots that have come to the Rod of Iron Freedom Festival for the last six years. As you can see, there is a change of venue this year. We have to give a big shout out to my brother, Justin Moon, (Applause) who has graciously opened up his property in Greeley every single year for the festival, personally burdening \$100 ,000 of insurance costs for such an event, as it is the world's greatest and biggest open carry event. So, I want to give a big shout out to my big brother, Justin, for holding down the fort every year and allowing us to use that great property. (Applause)

As you all know, when times are great, people don't buy guns. So, the whole gun industry is obviously under stress and it's not performing as it usually does. That's the kind of irony of the whole industry. This year was going to be a burden to my brother personally and to the whole organization there, so we didn't want to do that. We are grateful that we have a great facility in Newfoundland that has been serving the church community for a long time, a great auditorium there which used to be a former public auditorium area. So, all the indoor facilities make it possible for us to not have to stress about the weather and whether or not we will have good or bad weather during the festival and the festivities.

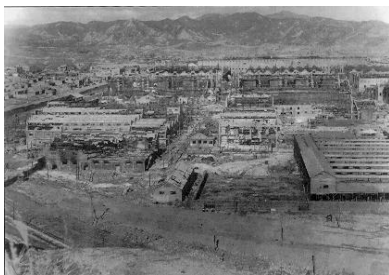

We want to give a shout out to the organizing committee and all the folks from around the whole area that always participate in helping organize the Rod of Iron Freedom Festival from security to the fire department to law enforcement and to all the patriots, the Second Amendment patriots that come, the local vendors and all the folks that come out every year to participate and to create such an amazing experience and amazing exemplification of the freedoms we have and hold so dear in America.

October 14, 1950

That being said, folks, America is in a great time of crisis. As you know, we started the Rod of Iron Freedom Festival, and it is held in October, because my father was in Heungnam Death Camp, which was a North Korean death camp, and he was freed in 1950, October 14th.

In the concentration camp, the normal lifespan of a prisoner would be six months, and obviously the normal work hours would be anywhere from 15 plus hours per day of hard labor, shoveling ammonium sulfate and doing other types of hard work under the barrels of the Communist Party. He was there for two years and eight months, and he became quite famous for sharing half of his rations with other starving prisoners, which was only literally a bowl of rice. He would only eat half and share the rest of the half with his prisoners.

And famously, at the time when the U. N. forces and the American forces came in to free True Father from the Heungnam North Korean communist death camp, he famously told the prisoners, "Stay with me and let's pray. God will preserve us and God will provide a way out". The bombs came down. These were the American forces, led by MacArthur. You know, of course, the famous Inchon Landing. The entire concentration camp of Heungnam, was exploded, and the literal walls of the prison that they were in, praying, were exploded out. And after the bombardment, they were able to waiting it out and actually flee that area, which was preserved, and God opened the door, so-to-speak, for my father and the rest of the concentration camp prisoners to flee and to be freed.

That is why we celebrate the Rod of Iron Freedom Festival in October, because good men with guns defeated bad men with guns, and personally as the Moon family, we experienced the liberation of our father from the Heungnam communist death camp.

Charlie Kirk

This year it was made known to me that October 14th is also the birthday of Charlie Kirk. Of course, we have witnessed a horrendous attack of terrorism upon American soil of one of our most beloved patriot leaders. He was probably the greatest young persons' leader in the entire country. And he had just come to South Korea and to Japan to stimulate and to encourage Asians in the Far East to hold down the fort and to protect their countries from the communist takeover, which was, of course, being planned by the globalist and the political satanist elite that were going to block President Trump. And with Kamala, who was going to create a new order where China would be on the rise and Xi Jinping would be the emperor of the world. We saw all the things that were lined up for that fact.

Charlie Kirk was killed in that horrific, despicable, and vile political assassination, the likes of which we have not seen for decades in the U.S., this level of political assassination on the level of JFK, really. Even though he wasn't a publicly elected official, he was one of the most important leaders in the MAGA movement, probably

one of the most important folks that actually got President Trump elected alongside Elon and probably RFK who really swayed the vote and got millions of people to stand for the Trump Revolution and MAGA in general. Make America Great Again.

Whatever has happened with the investigation and the obvious debacle that is happening and is unfolding before our eyes, the American people are awake to it and can see that obviously the Feds are not telling the truth. There are massive holes in the whole narrative of the "shooter running up on the rooftop", dismantling his gun, which was a .30 -06 Mauser, apparently, which is incredibly difficult to take apart.

You have to have tools and it has to be re-sighted in after you disassemble it. Apparently, it was disassembled, and then reassembled in the forest after the guy "jumped down and threw it away". But the only problem is that the screwdriver was on the rooftop. Anyways, it was just so ridiculous. And the people, we know we've been lied to about the Epstein files and the Charlie Kirk's assassination files.

So, the credibility of the Feds is, of course dropping, whether or not it was Mossad or Iran or China or whatever the situation was. Obviously, we want to give a big shout out to the actual journalists on the ground James O 'Keefe, Candace Owens, Ian Carroll, Alex Jones, Tucker Carlson, et cetera, the folks that are actually trying to get to the bottom of

this and not spin a narrative, whether it be for the benefit of the ruling elite or for a foreign power, so-to-speak. We all know that the truth must be revealed at this critical hour with the assassination of one of the most influential political people in the entire world, especially for young people. We're talking about the leader of a new generation.

America on Trial

And for Charlie to be assassinated in cold blood just for talking and opening the mic up to engage in civil dialogue, to have it escalate to this level, whether it was Transtifa or whatever, the fact of the matter that he was killed like this puts all of America on trial.

This is really a test to see whether or not America can actually tell the truth and find the truth about what has happened to one of its most important upcoming leaders, definitely a future presidential individual. That is, of course, once in a lifetime in terms of the oratory skills, debating skills, and his general love of Christ and love of people, engaging the opponents in such a peaceful and civil manner.

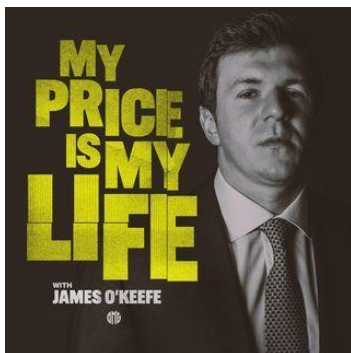

We, of course, are praying for the truth to come out of this incredible debacle. Shout to the Marine Rapper. He was just on the Billboard charts. He called me to jump on the remix of his Billboard chart winning the Charlie Kirk anthem song, along with about a dozen other Christian artists that are jumping up on that track. https://www.youtube.com/watch?v=5_s3yShP4EY He will be releasing that on the birthday of Charlie Kirk, which also happens to be, of course, October 14th, the liberation day of my father, True Father Sun Myung Moon.

So, we pray for America to get to the bottom of it and for the truth to be revealed wherever the truth may lead to and whatever future that may hold for America. It is so critical that we pursue the truth. Christ is the way, the truth, and the life. So, pursuing Christ and God and our Christian civilization. In our Christian civilization, truth is important; telling the truth and not lies is important. Finding the truth and not being led astray by propaganda and lies and being led into eternal and endless wars that are depleting our coffers, are killing our youth, and of course eradicating the destiny and future of our country.

So, the truth is important, and we must get to the bottom of the truth of this horrific assassination. This is a turning point for America and the world, for freedom worldwide. It was incredible that Charlie on that day was wearing a T-shirt that said freedom. So, for freedom worldwide, it really is important.

The Cost of Freedom is My Life

And the fact that he was shot in the neck in that gruesome and traumatizing way that the whole world had to see. Anybody who's standing for freedom had to see that that is the cost of freedom. As James O 'Keefe says, the cost of freedom has to be your life because if it's anything less, you can be bribed and you can be compromised. So, it has to be your life. It was for Jesus who gave his life on the cross for the propitiation of sins and for the salvation of humanity, right? So, it is the central crux of Christianity as well and of

Christian civilization. Anything less, if there's any number on what is your price, then you can be compromised and the gift of freedom that is given to us by God will not be passed on to the next generation.

Of course, in Scripture, when we look at Psalm chapter 2, Revelation chapter 2, Revelation chapter 12, Revelation chapter 19, we see the power of the Rod of Iron Kingdom. We see in Scripture that God is the first producer of a weapon of defense, the flaming sword, which guarded the gates of Eden after the fall of Adam and Eve. We see that even Jesus Himself made the whip and the scourge to chase the money changers out of the Temple. He was not just a hippie. He assaulted the money changers with a weapon that He created. And this is God in the flesh, right?

So as a Christian culture, there's nothing that prevents us from being an armed society and to be a society that still loves our neighbor. True Father always talked about the Peace Police-Peace Militia, a decentralized armed citizenry that loves God and loves our neighbor. That ethic must tie America together.

Without that ethic of "Love God and Christ," as a Christian civilization and "Love our neighbor", we will fall apart. We will become different competing religions fighting for the landmass of America with a growing Muslim population and all these different religions that no longer hold those values or have the central tenet of Christ's sacrifice, the sacrifice of love at the center of their religions. Some of these giant world religions seek to dominate the entire world and seek to put horrendous political structures of tyranny upon the world.

The Real Turning Point

So we are at a crossroads, folks, and everybody that is sitting here today is part of that turning point. God is the answer. We are His hands and feet, folks, so we are part of that answer. We are the ones that will change the destiny of America. We are the ones that will turn the tide, so-to-speak, and be the catalyst of the real turning point; the real

turning point towards sovereignty, the real turning point back to freedom, the real turning point of uniting and not falling into the race war that is being funded by Soros and the Rothschilds and the globalist communist elite. We are the turning point that demand the release of the Epstein file because, of course, that paints a bigger picture of what the elite are engaging in, and who actually rules us. These people must be exposed. These organizations must be exposed. And if there are foreign powers that are doing this and blackmailing our congressmen and senators, that has to be exposed. Christ is the light, folks. He is the way, the truth, and the life, and He is the light of the world that brings light to the darkness. That is what we need in this time of great tribulation right now.

Pray for President Trump, folks. Pray for one another. Pray for unity and peace in America. And pray that President Trump and all the patriots worldwide can stand with God and do our part to secure the freedoms and liberty that He has bestowed all men. We salute you. We thank you for being here.

We thank all the incredible speakers that will be with us for the next couple of days. And all the way out here from the Far East, we're sending prayers and love. Please pray for us, as this is also a dangerous part of the world. But we pray that God's Will and His gifts of liberty will prevail. And we know they will, because the devil is a loser, and he has already been defeated by the love and the sacrificial blood of Christ.

So, we stand on the winning team. As President Trump says, we like to "win, win, win". We stand on the winning team. We are praying for him, praying for all of America, praying for you. We pray for you, that you may have a successful and great Rod of Iron Freedom Festival. We love you all. We're signing out.

God bless, God speed, and may His Kingdom come.
