**University Hospitals Seidman Cancer Center at
Salem Regional Medical Center Earns Reaccreditation
From the Commission on Cancer**

The University Hospitals Seidman Cancer Center at Salem Regional Medical Center (SRMC) has once again earned reaccreditation from the Commission on Cancer (CoC), a quality program of the American College of Surgeons. This national recognition is awarded to cancer programs that meet rigorous standards for comprehensive, patient-centered care and demonstrate a continuous commitment to improving outcomes for the communities they serve.

To achieve CoC reaccreditation, cancer programs must undergo an extensive evaluation and on-site review every three years.

“Reaccreditation by the Commission on Cancer reflects the exceptional dedication of our physicians, nurses and care teams,” said Anita Hackstedde, M.D., SRMC President/CEO. “It affirms that patients throughout the Mahoning Valley have access to high-quality cancer care close to home, supported by advanced treatment options and the expertise of a nationally recognized cancer program.”

As part of the University Hospitals Seidman Cancer Center network, the program at SRMC provides local access to leading-edge cancer services, including medical oncology, radiation oncology, infusion therapy, clinical trials and supportive care. Patients benefit from a multidisciplinary team approach, where specialists collaborate to develop individualized treatment plans tailored to each patient’s needs.

The Commission on Cancer accreditation program is recognized nationwide as a hallmark of excellence. Accredited programs are committed to providing comprehensive, state-of-the-art cancer care and improving patient outcomes through ongoing quality initiatives.

Fellowship-trained Radiation Oncologist William Demas, M.D., is the Medical Director of the University Hospitals Seidman Cancer Center at Salem Regional Medical Center.
