

ATLAS AC-105

Inclined Platform Lift

SPACE SAVING. EASY ACCESS.

We know that a traditional seated stair lift isn't an option for everyone. **The Atlas AC-105 is the most convenient and affordable way** for those with a wheelchair, power chair, or scooter to access all levels of your home.

This platform fits most single flight straight staircases and can easily be folded up, allowing easy access to the stairs when not in use.

FULLY MOTORIZED.

In addition to a compact and user-friendly design, the Atlas AC-105 has fully motorized floors, arms, and access ramps to ensure a safe and ease of use for both you, your wheelchair and anyone else using the stairs.

The ramp and guard rails fold and lock in place during operations and release at landings for easy boarding and exiting.

KEY FEATURES FOR PEACE OF MIND

- Fully motorized for ease of use
- 550lbs weight capacity
- Wall modifications not required
- Space saving — can be folded up to allow others to use the stairs when not in use
