

2025

Implementing Intelium

“

Migrating an academy is no small undertaking. Intellum's team took us through the process step by step, and we launched to a big spike in learner numbers and engagement.

Next Steps

Preparing for Implementation

Prepare Your Content

Review existing materials and identify what needs to be migrated, updated, or created.

Assemble Your Internal Team

Include stakeholders, content creators, designers, and decision-makers. Ensure everyone understands their role in the implementation.

Gather or Create Brand Assets

Collect essential brand elements like logos, fonts, color codes, and imagery.

Become an Intellum Expert

Explore platform training, resources, and best practices. The better you understand Intellum, the more effectively we can configure your solution.
