

# Built for speed. Ready for AI.

## Enterprise-grade authoring

Seamless, scalable, and secure—designed for global teams.

- Quick authoring with an intuitive interface
- Full creative control with limitless customization
- Boost engagement with dozens of interactive elements
- Collaborate in real time to accelerate content development
- Accessibility and inclusivity built into every course

## Built to scale

Powerful enough for the largest content teams and programs:

### Multilingual Reach

Supporting 50+ languages across 5 continents

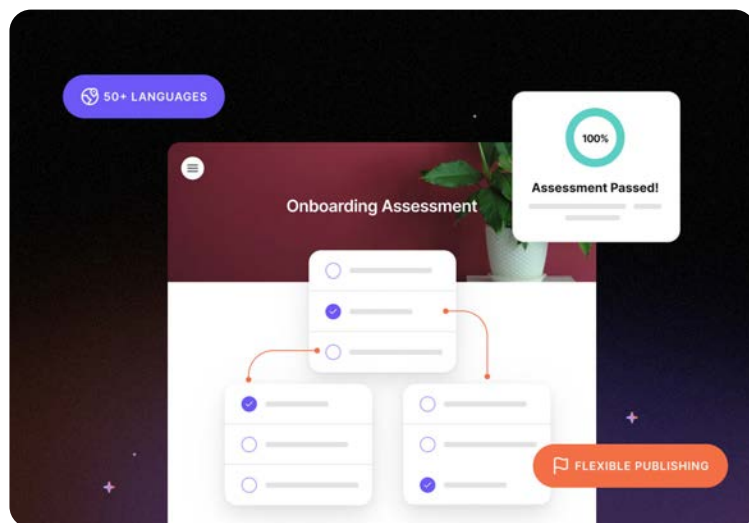

### Flexible Publishing

Publish inline, to LMS, SCORM, offline, or web—one tool, many formats

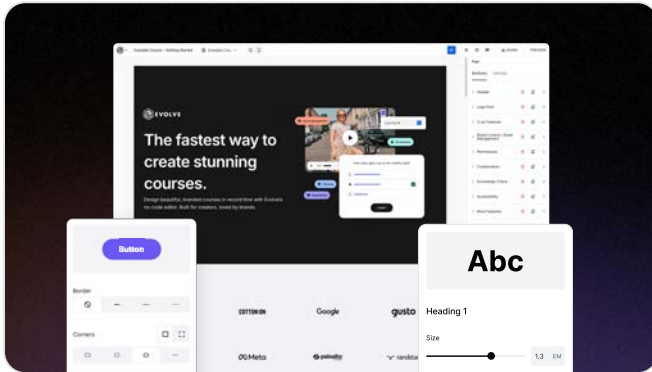

### Certification & Assessment Support

Create quizzes with branching, content locking, and seamless grading

# The Features

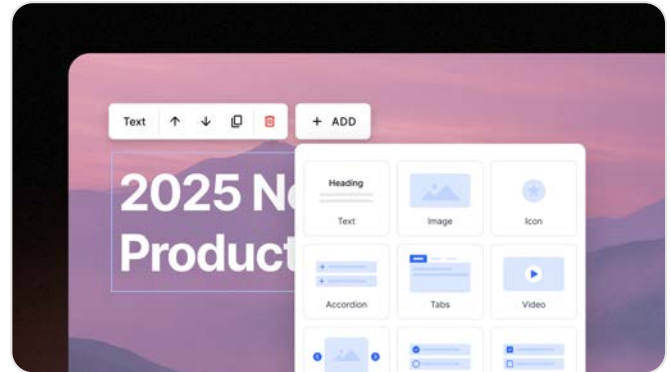

## Streamline content creation

Author high-quality, interactive courses quickly.

### Swiftly adapt to evolving educational needs

- Speed up development with customizable, pre-built templates
- Simplify collaboration with multiple user roles and shareable live previews
- Publish anywhere using SCORM 1.2, SCORM 2004, and xAPI

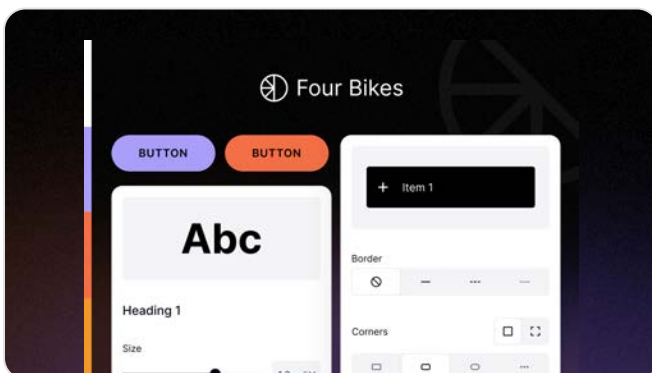

## Captivate and engage

Enhance learner engagement and completion through dynamic interactions.

### Transform learning into experiences

- Build rich simulations and immersive video experiences
- Drive engagement with dozens of interactive elements
- Customize templates and components to align with your goals

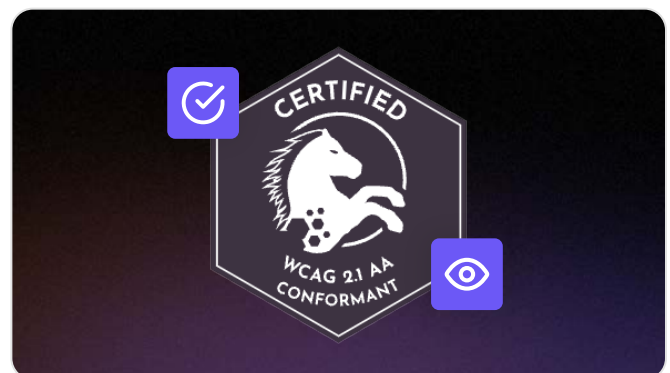

## Build your brand

Take full control over your content's look and feel, ensuring brand consistency at scale.

### Align your audience to your story

- Easily customize logos, fonts, and colors to match your brand
- Apply branding at scale using custom themes
- Automatically sync changes across courses

## Accessible and inclusive

Ensure every learner has access to equitable education.

### Global accessibility made easy

- Build WCAG 2.1 compliant courses out of the box
- Automatically localize content
- Provide learning for all through inclusive design

“

Evolve Authoring is such an essential tool, especially for those getting into course creation. What I especially love is how intuitive and easy-to-use it is.

– Instructional Designer in the computer software industry

“

It's a really straightforward tool to rapidly build in. It's great to prioritize accessibility in the tool and to customize the look/feel of a course.

– Senior Content Developer in the elearning provider industry

“

Evolve authoring allows us to create interactive courses and brings our content to life. The theme is 100% customisable so this is great for our branding. It also enables language versions which is fantastic for international courses.

– Content Designer in the professional training and coaching industry

“

I appreciate the ability to see in real time what design decisions or alterations look like. I also like the degree to which you can customize components, which in turn enables the creation of more engaging learning activities.

– Learning Designer in the education administration programs industry

“

I use Evolve daily. Evolve helps me create courses that look sharp. What I like most about Evolve is the large range of components, from text and image to game quizzes.

– Learning Experience Designer in the software development industry

“

The HTML-based components allow for easy readability from screen readers and various browsers.

– Instructional Designer in the computer software industry
