

SENTINELSYSTEMS
SPECIALISTS IN VEHICLE SAFETY

Case Study London Borough of Barnet

Since 2013, London Borough of Barnet and Sentinel Systems have worked together to deliver the highest safety standards for operators and vulnerable road users across a fleet of almost 50 refuse recycling vehicles.

A complete upgrade in 2020 delivered the latest in all-round safety technology, including 6 cameras, left turn alarm, Sentinel's Side Scan sensor technology, SafetyStop™ radar warning and autobrake, and Sentry Live View, for remote camera access & fleet management.

Barnet's new systems harness Sentinel's many years' refuse vehicle experience, focusing on operator, cyclist and pedestrian safety, eliminating blind spots, integrating automated technology with interactive alerting, as well as simplifying incident reporting & investigation, and facilitating more efficient fleet operation.

Industry-leading Safety & Operating Efficiency

- 6 cameras: front, side and rear of vehicle
- In-cab AHD Monitor & MDVR
- Twin SafetyStop™ Radar Warning & Auto Braking
- Side Scan System sensors and alerting
- Automated left turn and reversing warnings
- Live View - remote access & GPS fleet management
- DVS compliant

Sentinel Systems provide technical specification, positioning, installation, training & support.
