### **America's ToothFairy Celebrates Record-Breaking Year of Education and Expanding Access to Care for Underserved Children**

**CHARLOTTE, NC (December 16, 2025)** — America's ToothFairy announced the results of another remarkable year advancing oral health equity for children and families who struggle to access dental care. During the organization's 2025 fiscal year, programs supported by America's ToothFairy empowered more than 1.4 million children and caregivers with vital oral health education and access to preventive services.

Through its Dental Resource Program (DRP), safety-net dental clinics provided clinical services and oral health education to 310,114 children and 105,780 parents and caregivers—a 42% increase over the prior year's averages. These partners deliver preventive and restorative care to children who might otherwise go without treatment.

At the same time, America's ToothFairy's educational initiatives reached over 1 million children and caregivers through nationwide campaigns, free classroom resources, and oral health kits that make learning about prevention engaging and fun. Since 2020, more than 2.8 million people have learned about oral health using the organization's free online resources.

"Every toothbrush, every lesson, and every act of generosity makes a lasting impact," said Jill Malmgren, Executive Director of America's ToothFairy. "We're deeply grateful to the partners who make this work possible and to the clinics and educators who bring healthy smiles to life in their communities."

The organization's success this year was made possible through the generous support of its Corporate Underwriters: [Septodont](#), [Align Technology](#), [TSC EcoSolutions](#), and [Solventum](#). Their investment supports the organization's operational expenses and provides vital resources for programs that deliver education, prevention, and treatment for children across the U.S.

As America's ToothFairy prepares to celebrate its 20th anniversary in 2026, the nonprofit is renewing its commitment to closing the gap in oral health equity and ensuring that every child—regardless of circumstance—can grow up healthy, confident, and free from dental pain.
