## Your Opinion Matters

Please let us know what you think of a change of Christmas tree on the Market Place.

Each year we spend iro £300 just to kill a tree then dump it. Additionally, there are always complaints that it's either not big enough, or it's wonky or the lights have been dislodged in the winds etc.

A tree like one below, will save ratepayers money in the long term, lasting many years and will always look symmetrical.
