

ONE SERVICE, FOR EVERY COMMUNITY

We're modernising to keep Buckinghamshire and Milton Keynes communities safe now and in the future!

Proposed Changes

Some On-Call fire engines are rarely used or not crewed. We're proposing to:

- Remove seven On-Call fire engines from stations with persistently low availability
- Replace some of the removed fire engines with On-Call crewed specialist vehicles
- Close two long-term dormant stations
- Reinvest to improve resilience and response

We are also asking your opinion on giving Chief Fire Officers more operational independence which it is part of a national conversation about modernising the fire and rescue sector.

What's NOT Changing

- **No reduction** in firefighter numbers
- **No reduction** in 24/7 Wholetime fire engines
- You'll still get a fast, skilled response, wherever you live

Find out more and help shape the final decision. Take part in our **On-Call Consultation**
