

Development Works - A422 Chicheley Hill Roundabout Construction

We are carrying out the statutory functions of the Highway Authority for this development under the Section 278/38 agreement. This includes the function that allows a third party to undertake the agreed works, with valid planning consent, on the public highway.

The works are being carried out by St James Group as part of a Section 278/38 Highways agreement and approved planning permission 21/00999/OUTEIS.

!!From beginning of June the road will be reduced to one lane in each direction under a contraflow. There will be overnight closures to put this in place. Most of the works will be undertaken offline with little impact to the Public Highway carriageway. Works on the existing carriageway are due to start 16th June 2026 for a duration of approximately 18 weeks. There will be contractor presence after this date within the verge and footways to finalise other elements of the works.

The traffic management for the carriageway incursions are planned to be split into 5 phases.
