

# Threat Check Assessment

Learn how to put next-generation Microsoft Security tools to work for you

Do you know how many phishing attacks your organization has received? If employees are using the right authentication protocols? Whether personal data is being exposed? In short, is your organization's Cloud environment as secure as you think it is?

## Improve your Security Posture with an Invoke Threat Check Assessment

Organizations today are managing a growing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems. Get help achieving your broader security objectives—and identify current and real threats—by scheduling a Threat Check Assessment with Defender and Sentinel from Invoke.

Our team can help you develop a strategic plan customized for your organization and based on the recommendations of Microsoft experts in security. You'll gain visibility into immediate threats across email, identity, and data, plus clarity and support on how to upgrade your security posture for the long term.

Assess and review your security goals and objectives

Identify real threats in your Cloud environment with Invoke Threat Check

Map identified threats to specific solution recommendations

Showcase security scenarios with product demos

Develop joint plans and next steps

# Why You Should Attend

Given the volume and complexity of identities, data, applications, devices, and infrastructure, it's essential to learn how secure your organization is right now, and how to mitigate and protect against threats moving forward. By attending this engagement, you can:

Identify current, ongoing security threats in your Cloud environment

Walk away with actionable next steps based on your specific needs and objectives

Document your security strategy for the benefit of key stakeholders

Better understand how to accelerate your security journey using the latest Microsoft Security tools

## Engagement Deliverables

- Deep analysis of cybersecurity threats that are found targeting your organization
- Actionable recommendations to help immediately mitigate the identified threats and discovered vulnerabilities
- An MDE Vulnerability assessment of your IT and security priorities and initiatives, direct from Invoke cybersecurity professionals
- An inside look at Microsoft's holistic approach to security, and how it relates to your organization
- Demonstrations of integrated security, including the latest Defender tools and XDR methods
- Long-term recommendations from Microsoft Security experts about your security strategy, with key initiatives and tactical next steps
