

Rechargeable Asset Tracker (GV620MG)

Protect Your Investment and Improve Your Bottom Line

The Azuga Rechargeable Asset Tracker is a weatherproof tracking device designed for reliable, long-term deployments. The device, manufactured by Queclink, is an ideal solution for managing assets that are normally tethered to 8 to 32 volt systems but may sit disconnected for periods of time. The battery has a 6-month life (provided 1 ping a day) and is recharged when the asset is powered on.

The asset tracker adapts its operation to your asset's current status; changing transmission modes based on whether your asset is stationary or on the move.

The Azuga Asset Tracker lets you monitor the location and status of your assets with one easy-to-use web interface, featuring dynamic maps, real-time alerts, historical reports and more.

FEATURES

6 months with single message cycle per day on fully charged batteries

Superior cellular and GPS wireless performance

Li-ion, 3.7V, 5800 mAh

Sealed, rugged enclosure to withstand harsh weather (IP67)

External surface-mountable

Built-in motion sensor

LED lights and indications for easy troubleshooting

Internal GPS & GPS antennas

Detailed historical activity reports

APPLICATIONS INCLUDE

- Trailers and shipping containers
- Generators, mobile lights, and signs
- Mobile storage units
- Construction
- Heavy equipment
- Cold chains
- Pharmaceutical transportation
- Refrigeration trailers

SPECIFICATIONS

Dimensions	5.43"(L) × 2.60"(W) × 1.50"(H)
Weight	320g (11.29 oz)
Location Technology	72 Channel GPS
Communication Modes	TCP, UDP, SMS
Operating Temperature	-30°C~+80°C
Battery	Li-ion, 3.7V, 5800 mAh
Operating Voltage	DC 8V to 32V
