

Information About This Service

Offer Description	Fast Fibre is a business-grade fixed-line internet service delivered over a metropolitan fibre network. It provides symmetrical bandwidth with high-performance connectivity suitable for data, voice, cloud applications, and site-to-site communication. The service is designed for organisations that require consistent throughput, low latency, and reliable access for operational systems, remote access, and hosted workloads. It supports high-volume data transfer, real-time collaboration tools, and continuous connectivity for critical business functions, offering a stable platform for both on-premises and cloud-based environments.
Hardware	This service requires a compatible fibre network termination device at the customer premises. Where an existing termination device is present and operational, it will be used for service delivery. Where no suitable device exists, installation of a new termination device may be required as part of the service setup. Customer-supplied routers, firewalls, or switches may be used if they meet the required interface and configuration standards. Managed hardware is not included unless ordered separately.
Standard Installation Requirements	A suitable fibre entry point and internal pathway must be available at the premises. Standard installation uses an existing operational fibre termination point. If no termination point is present, or if additional works are required to reach the customer's preferred equipment location, non-standard installation charges may apply. The customer must provide safe site access during business hours and ensure that required internal cabling, power outlets, and mounting locations are prepared before installation. For more information, please speak to our customer service team on 1300 00 NEXT (1300 006 398).
Exclusions and Limitations	The service does not include new fibre build works, internal cabling beyond the network boundary, or service relocation. Managed hardware, extra IP addressing, and optional add-ons are excluded unless ordered. Performance may be affected by customer equipment, cabling, power, or site conditions. Restoration targets apply only to network faults; issues caused by customer equipment or environment are the customer's responsibility. The service does not guarantee performance for applications needing specialised configuration, traffic prioritisation, or enhanced redundancy unless purchased separately.

Pricing Example

Plan	Fast Fibre 250/250 Mbps
Minimum Term	36 months
Plan Pricing	\$349 per month
Minimum Cost	\$12,564
More Information	For full details of available packages, pricing, and inclusions, contact our sales team on 1300 722 320.

Early Termination Fee

An early termination fee applies if the service is cancelled before the end of the contracted term. The fee is calculated as the remaining months of the minimum term multiplied by the monthly access charge for the selected speed tier. Any outstanding installation, setup, or non-standard works charges remain payable in full.

For full terms & conditions go to [Next Telecom Terms & Conditions](#)

Other Costs

Additional charges may apply for non-standard installation, new fibre build requirements, internal cabling, relocation of the service, or changes to the service after activation. Charges may also apply for incorrect fault reporting, missed appointments, or restoration work required due to customer equipment, power issues, or site conditions. Any optional add-on services, additional IP addressing, or managed hardware are billed separately.
