

# DashCam-Lite

Eyes on the  
road mean  
safer fleets

Fleet vehicle accidents are among the most costly of injury claims for business. With an estimation of more than 5 million crashes every year, Safety should be everyone's priority.

For any company with a fleet of vehicles of any size, you need complete visibility into their Fleet and Driver Safety. With Azuga DashCam, fleet managers can now review video footage that is automatically triggered to record what happens before, during and after a risky event or incident.

Video analytics of risky driver events will help increase safety, reduce risk and defend against no-fault accidents.

## Complete Visibility Protect your fleet

Azuga DashCam Lite has been designed to obtain full visibility on your fleet and your drivers whenever you want and wherever you are. Continuously monitors driving activity, and when triggered, automatically records video before and after an incident is detected related to hard braking, sudden acceleration or hard cornering.

Video clips are transmitted to the cloud and added to individual drivers' reports that include time, date, location and speed details. Video safety to help track unsafe driving and exonerate drivers in no-fault accidents.

## Breakthrough pricing

You no longer need to buy a separate dash cam to improve your road safety. Install the app and you are ready to roll! Saving you the cost of purchasing an expensive hardware dashboard camera.
