FuelSaver

Identifying the most impactful ways to **lower operating expenses**, with a focus on **reducing fuel usage**.

Every fleet owner knows that for their business to be profitable, operating costs need to be as low as possible. Monitoring fuel usage is one of the best ways to drastically reduce those operating costs. Minimizing fuel usage goes way beyond just getting MPG reports and gas station receipts. A useful fuel report should tell you how much you are paying for fuel, where to get cheaper fuel, and what is actually happening at the gas station.

With Azuga FuelSaver, you can expect a fuel report with actual usable data. In fact, Azuga's customers have seen up to 10% savings in fuel costs by using this very simple but effective report.

FUELING EVENTS

Track increases and decreases in fuel levels that exceed 30%. Determine which drivers filled up their tank, and at what address.

NEAREST AND CHEAPEST

Automatically alert drivers to fill up at the nearest and cheapest gas station.

FUEL CARDS

Integrate fuel cards seamlessly to compare fuel purchased vs. fuel used and vehicle maintenance costs.

FuelSaver lets you proactively monitor and determine potential savings and opportunity costs in terms of the fuel purchased and help improve ROI.

What you can expect:

- ➔ Instantly **save** up to 10% of your fuel costs by getting real-time alerts on where to get the cheapest fuel.
- ➔ Virtually **eliminate** fuel theft.
- ➔ **Track** and **change** MPG performance among your drivers and reduce your fuel costs.
- ➔ **Reward** your best performing drivers with Azuga Driver Rewards.
