

Business Intelligence

Custom Reports. Deep Insights. Free.

Every fleet is different, and every business has different goals and performance indicators. Fleet GPS solutions use different approaches to provide operational insights:

- ➔ Just the standard reports. Custom reporting is an upcharge and even here, significant delays in delivery and many questions on data quality.
- ➔ Do it yourself custom reporting on web portals. There are many questions here on time available for fleet managers to pursue reporting on their own. And even when an attempt is made, questions on data quality remain.

The free Azuga Custom Reporting Service works directly with Fleet operations professionals and builds custom reports that are not simply delivered to an inbox. Azuga Data Science and Big Data teams perform deep inspections into the data and annotate reports with key insights. A Customer Success representative will then explain the reports and actions that need to be taken.

With seamless integration between other applications and highly customizable visualizations, analysis, and custom reports, Azuga can transform your fleet information into actionable business intelligence in real time. This is still phase 1 in our journey. Azuga is working on Machine Learning and AI (Artificial Intelligence) so that we can progress from 'Tell me something I don't know' to 'Well, don't just tell me, fix it for me'.

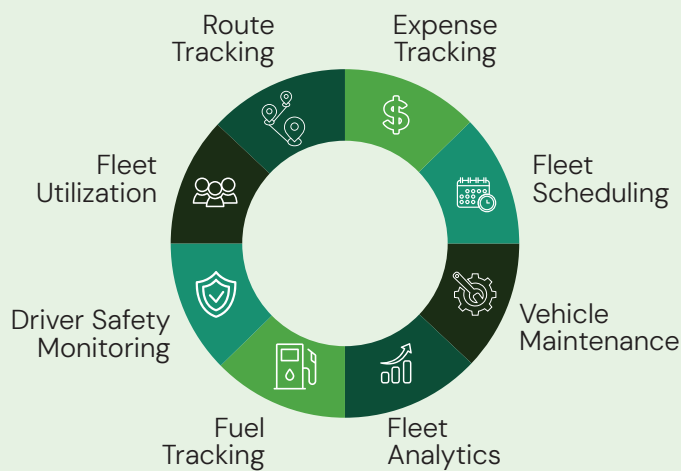

Here are some examples of our custom reports:

Fuel Reports

- ➔ Fuel transactions, Correlations with Fuel Cards.
- ➔ Unusual Spikes, Unexpected consumption compared to expected MPG.
- ➔ Nearest-cheapest gas options for drivers. Opportunity costs gained (driver responds to nearest-cheapest gas). Opportunity lost when driver ignores recommendation.
- ➔ Expected MPG based on Make-Model-Year of vehicle. Actual MPG for similar vehicles in your neck of the woods and in your industry.

Maintenance Reports

- ➔ Azuga Deals: Coupon mining of oil changes and other service types in your neck of the woods, sent via email to drivers and fleet managers when the scheduled maintenance is due.
- ➔ Alerts based on miles, time intervals and actual engine hours.
- ➔ Detailed Vehicle's scheduled maintenance for all or a group or one particular vehicle for all service types, Report odometer readings for each vehicle at the start and end of the week.
- ➔ Low battery connect and disconnect alerts.

Driver Behavior Reports

- ➔ Geofence violations; Speeding patterns within a geofence during specific times of day
- ➔ Coaching report for drivers based on idling, speeding, hard braking, extreme braking and rapid acceleration with detailed displays details for each type of event

- ➔ Correlation between current driving behavior and future risk, personalized for each based on reported accident data
- ➔ Driver Scoring, Ranking and individual corrective and coaching suggestions for drivers.

Fleet performance reports

Azuga's Quarterly and Annual Fleet Reviews provide weekly and monthly performance metrics for the fleet as well as industry averages on:

- ➔ **Fleet Operations** – miles driven, stops made, unauthorized miles, Idling, etc.
- ➔ **Fleet Safety** – Speeding, Braking, Acceleration
- ➔ **Fleet Utilization** – peak-hour and peak-day utilization, days driven, etc.
- ➔ **Fleet Vehicle Health** – DTC and battery events.

Productivity Reporting

Customized Timesheet and activity report for shifts with time duration, Get Vehicle details with trip latitude and longitude.

Insurance Reporting

- ➔ Behavior and Risk Scores – vehicle scores and fleet scores; daily, monthly, since inception scores.
- ➔ Zip code miles report; Driver and vehicle summary report; trip report.
