Enhanced ECM Data Subscription

Support for Electric Vehicles (EVs) and Internal Combustion Engine (ICE) vehicles

Building a fleet management platform has never been easier—no hardware needed. Get access to Engine Control Module (ECM) vehicle data for electric vehicles like battery level, charging status, and more. In addition, get access to tire pressure, oil life, and door lock and unlock on newer ICE vehicles (2015 and newer).*

Benefits

Real-time GPS tracking
Monitor and track vehicle location of your fleet without GPS tracking devices. ZERO HARDWARE.

Efficient fuel and EV battery management
Read the electric vehicle battery level and monitor charging progress allowing you to better plan trips.

Accurate mileage information
Manage preventive maintenance schedules with the integration of odometer readings.

Vehicle Data Captured

EV battery status
- Location
- Battery percent remaining
- Range
- Plugged in notifications
- Charging state

For ICE Vehicles
- Tire pressure
- Oil Life
- Door lock and unlock
- Odometer
