

The **Safety Driven** Telematics Solution

Safety and accidents are a major cost for your business, your reputation, and for your employees. **Let Azuga Fleet help you reduce the risk and increase your success!**

Unsafe Driving Costs:

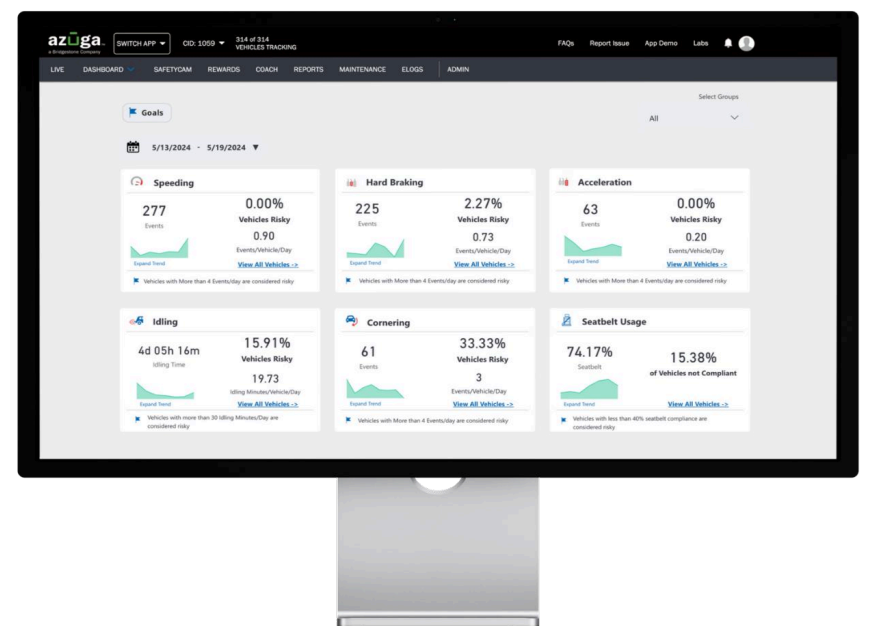

Average cost:	\$16,500
Average cost with injuries:	\$74,000
Average cost with fatalities*:	\$500,000

With the ease of a “plug and play” installed OBDII device, you can unlock safety for your fleet.

This gives you the ability to determine when driving behaviors are becoming a risk to your fleet’s safety – detect hard braking, hard acceleration, and hard cornering.

Azuga SafetyCam is the most accurate witness to capture your drivers’ views of the road.

Enhance fleet safety with Azuga. Gain complete visibility, coach high-risk drivers, investigate incidents quickly, reduce accidents and costs, protect your drivers, and access event videos within Azuga Fleet or FleetMobile.
