

Custom Reporting

Business Intelligence.
Actionable Insights. Free.

Data is the key component to making change. Azuga understands that every fleet is different, and every business has different goals and performance indicators. Azuga Custom Reporting provides fleet operations professionals with meaningful custom reports. Azuga's Data Science team performs deep inspections of your fleet information and annotates reports with key insights. From there, we take it one step further. Your Customer Success representative will walk you through the reports and make recommendations based on your organization.

Other fleet GPS solutions use different approaches to provide more than the standard reports. Some offer do-it-yourself custom reporting on web portals, while others have an upcharge with significant delays in delivery and questions on data quality. How much time do you want your fleet manager to pursue custom reporting on their own? With seamless integration between other applications and highly customizable visualizations, analysis, and custom reports, Azuga can transform your fleet information into actionable business intelligence in real time at no cost.

Custom Reporting

Business Intelligence..
Actionable Insights. Free.

Here are some examples of our custom reports:

DRIVER BEHAVIOR REPORTS

- Coaching report for drivers based on idling, speeding, hard braking, extreme braking and sudden acceleration with detailed displays details for each type of event
- Geofence violations.
- Speeding patterns within a geofence during specific times of day
- Correlation between current driving behavior and future risk
- Driver scoring, ranking and individual corrective and coaching suggestions for drivers

FUEL REPORTS

- Fuel transaction details compared with data retrieved from fuel cards, along with fuel event data reported by the GPS device
- Unusual spikes, unexpected consumption compared to expected MPG
- Nearest-cheapest gas options – Opportunity costs gained or lost when a driver accepts or ignores recommendations
- Expected MPG based on make–model–year of vehicle, plus actual MPG for similar vehicles in your area and in your industry

MAINTENANCE REPORTS

- Detailed vehicle's scheduled maintenance for all vehicles, or a group or one particular vehicle for all service types
- Alerts based on miles, time intervals and actual engine hours
- Low battery, connect and disconnect alerts
- Odometer readings for each vehicle at the start and end of the week

FLEET PERFORMANCE REPORTS

Azuga's Quarterly and Annual Fleet Reviews provide weekly and monthly performance metrics for the fleet as well as industry averages on:

- Fleet Operations – miles driven, stops made, unauthorized miles, idling, etc.
- Fleet Safety – speeding, braking, acceleration
- Fleet Utilization – peak hours and peak days and days driven, etc.
- Fleet Vehicle Health – DTC and battery events

PRODUCTIVITY REPORTING

- Customized timesheet and activity report for shifts with time duration
- Vehicle details with trip latitude and longitude

INSURANCE REPORTING

- Behavior and Risk Scores – vehicle scores and fleet scores; daily, monthly, since inception scores
- Driver and vehicle summary reports, plus; trip reports
- Zip code miles report
