TB2000MS ROAD BROOM

Sewell Sweepers offer a mine spec. specific road broom for mine site haul roads. Not only is the unit ideal for the cleaning of debris from haul and service roads, but also for buffing emulsion surfaces that may cause interference with autonomous haulage trucks, etc.

The Australian-made, Australian Design Rules (ADR) compliant road brooms are designed to be best in class, and to operate efficiently and safely across public roads.

Using 60+ years of engineering expertise. Through customer testimonies and product followup are dependable and reliable under the toughest mining conditions.

Product support and parts availability are to the highest industry standard.

SPECIFICATIONS & STANDARD EQUIPMENT

Our TB2000MS Road Broom is powered by its own diesel engine and towed behind a Four-Wheel Drive and comes in the following arrangement:
