DESCRIPTION	The Howard Collection of lighting is a celebration of New York’s material palette, as seen through Scandinavian eyes. Dominated by dark metals and industrial aesthetics, the character of the metropolis has become globally iconic, and the Howard Collection is Space Copenhagen’s tribute to it. The Howard Chandelier is the result of an extensive collaboration between GUBI and Space Copenhagen as well as the use of the latest prototyping technology to ensure optimal design. A piece of engineering ingenuity featuring either four or six ‘octopus’ arms, the result is a grand gesture with a modern, sophisticated and strong expression – ideal to place above a dining table in a private residence, in the board room of an office, or as a statement piece in a restaurant or hotel lobby
