MAE / TABLE,
Marco Acerbis

The Mae table, designed by Marco Acerbis, brings the sculptural elegance of the Noa collection indoors. Featuring a tapered conical base and a refined hand-applied lime-clay finish, it is available in oval and round versions. The MDF top combines aesthetics and functionality, making Mae a perfect balance of design and craftsmanship.

Termoplastic polymer:

High-density thermoplastic polymer, stiffened by a polymer resin. The surface finish, applied by hand, consists of spatulated lime and clay coating. A matt two-component polyurethane protective coating is added to the surface finish.

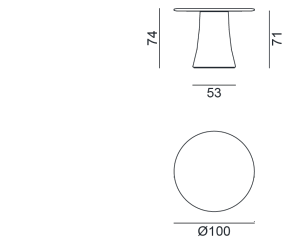

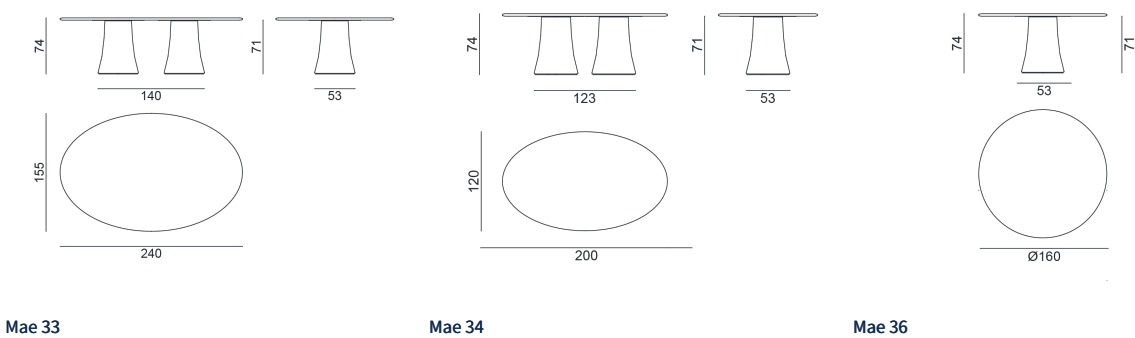

MDF:

MDF (Medium-Density Fiber-board) is a wood product, the panels are obtained from very thin fibers, which are bind together with a glue material and compacted by applying high pressure. Spatulated lime-clay coating.
