by David Thulstrup

BRDR. KRÜGER

Dimensions	
Height	820 mm
Width	550 mm
Seat Height	460 mm
Seat Depth	450 mm
Box	630 x 590 x 900 mm
Weight	7 kg

Responsibility

At Brdr. Krüger, sustainable product lifecycle considerations are at the heart of everything we do with focus on benefits for the environment, workers, and end-users. We source high-quality materials from certified sustainable forest management. The manufacturing processes run on low-emission hydropower and waste-to-energy solutions, acheaving a near carbon-neutral effect and minimizing our reliance on fossil fuels. Our commitment to traditional craftsmanship and durable design ensures that our furniture is not only timeless but also built to last, contributing to sustainability for future generations.

Test and Certification

This chair has been tested for strength, durability, and safety through independent third-party verification in accordance with EN 16139 Level 2, making it suitable for extreme use. The wood is sourced from sustainably managed forests and certified by PEFC through independent third-party verification.

Meeting Regulations

The Clear Oil features a low VOC content and is fully compliant with EU regulations. This product contains no biocides, ensuring a natural and environmentally responsible finish. Worker safety is a high priority, with all processes conducted under controlled conditions in accordance with unions and national regulations.

Maitenance

Please see our Maitainance & Care instructions at www.brdr-kruger.com/maintenance/

Gliders

Felt gliders installed as standard
Plastic gliders available upon request.

AVCX-OWO-01

Fumed Oak, Oiled
AVCX-OFU-01

Variants

Available in different oak finishes, with hand-woven or solid backrest.

Materials, Process and Finishing

Handcrafted with care from solid European oak, the frame is carefully detailed with woven surfaces using paper cord. It combines Brdr. Krüger's skilled joinery with modern technology to achieve precision and lasting quality. Hand-assembled using time-honored techniques for strength and durability. Surfaces are finely sanded by hand for a smooth, tactile finish, and a clear oil is applied to protect the wood while preserving its natural character.

Fumed Oak Process

For a deeper tone, the oak undergoes a traditional fuming process, where it is exposed to a small amount of ammonia vapors in a sealed environment for 20 hours. This reaction with the wood's natural tannins enhances the grain structure and deepens the color. As a natural, non-surface-based treatment, no dyes are used, preserving the wood's authentic character. Variations in hue may occur depending on the tannin content of each piece.

Craftsmanship Statement

We support and foster the Danish cultural heritage of craftsmanship by preserving and advancing the traditional techniques nurtured in our family workshop since 1886. This commitment reflects both the preservation of the craft and its evolution through the integration of new techniques, innovation, and design development.

Description

The ARV Chair embodies a harmonious fusion of classic craftsmanship and contemporary design clarity. Originally created for the historic Danish restaurant Noma, the ARV Chair was designed to be both elegant and enduring, standing up to the needs of refined hospitality environments. Its intricate joinery is inspired by traditional woodworking, while the overall form embraces lightness and refinement.
