## Dimensions

Height	760 mm
Width	700 mm
Seat Depth	536 mm
Seat Height	386 mm
Box	740 x 720mx 800 mm
Weight	15 kg

## Responsibility

At Brdr. Krüger, sustainable product lifecycle considerations are at the heart of everything we do with focus on benefits for the environment, workers, and end-users. We source high-quality materials from certified sustainable forest management. The manufacturing processes run on low-emission hydropower and waste-to-energy solutions, achieving a near carbon-neutral effect and minimizing our reliance on fossil fuels. Our commitment to traditional craftsmanship and durable design ensures that our furniture is not only timeless but also built to last, contributing to sustainability for future generations.

## Test and Certification

The wood is sourced from sustainably managed forests and certified by PEFC through independent third-party verification.

## Meeting Regulations

The Clear Oil features a low VOC content and is fully compliant with EU regulations. This product contains no biocides, ensuring a natural and environmentally responsible finish. Worker safety is a high priority, with all processes conducted under controlled conditions in accordance with unions and national regulations.

## Maintenance

Please see our Maintenance & Care instructions at [www.brdr-kruger.com/maintenance/](http://www.brdr-kruger.com/maintenance/)

## Variants

Available in two wood finishes—Oiled Oak and Fumed Oiled Oak. The canvas pieces are supporting cushions upholstered with canvas, leather or custom-selected material.

## Materials, Process and Finishing

Crafted in Denmark, the chair is available in a selection of sustainably sourced wood, chosen in collaboration with the American Hardwood Export Council. The upholstery is offered in natural canvas or brandy leather, providing both comfort and durability. Each piece is meticulously hand-sanded in gradual steps to achieve a soft, tactile finish, and treated with a clear oil that enhances the wood's durability while preserving its natural repairability.

## Fumed Oak Process

For a deeper tone, the oak undergoes a traditional fuming process, where it is exposed to a small amount of ammonia vapors in a sealed environment for 20 hours. This reaction with the wood's natural tannins enhances the grain structure and deepens the color. As a natural, non-surface-based treatment, no dyes are used, preserving the wood's authentic character. Variations in hue may occur depending on the tannin content of each piece.

## Craftsmanship Statement

We support and foster the Danish cultural heritage of craftsmanship by preserving and advancing the traditional techniques nurtured in our family workshop since 1886. This commitment reflects both the preservation of the craft and its evolution through the integration of new techniques, innovation, and design development.

## Description

The HB Lounge Chair embodies a harmonious blend of Danish modernism and timeless craftsmanship. Drawing inspiration from Bølling's iconic tray-table, the chair features a minimalist design characterized by elegant curves and architectural lines, reflecting Bølling's signature balance between simplicity and intricate detail. Its thoughtful construction and refined aesthetics make it a versatile addition to various interior settings, from residential living spaces to sophisticated hospitality environments.
