Length	2400 mm
Width	1050 mm
Height	750 mm
Solid Wood Table Top Thickness	30 mm
Box	2450 x 1100 x 140 mm
Weight	80 kg

Responsibility

At Brdr. Krüger, sustainable product lifecycle considerations are at the heart of everything we do with focus on benefits for the environment, workers, and end-users. We source high-quality materials from certified sustainable forest management. The manufacturing processes run on low-emission hydropower and waste-to-energy solutions, achieving a near carbon-neutral effect and minimizing our reliance on fossil fuels. Our commitment to traditional craftsmanship and durable design ensures that our furniture is not only timeless but also built to last, contributing to sustainability for future generations.

Test and Certification

This table has been tested for strength, durability, and safety through independent third-party verification in accordance with **EN Level 2, making it suitable for extreme use. The wood is** sourced from sustainably managed forests and certified by PEFC through independent third-party verification.

Meeting Regulations

The Clear Oil features a low VOC content and is fully compliant with EU regulations. This product contains no biocides, ensuring a natural and environmentally responsible finish. Worker safety is a high priority, with all processes conducted under controlled conditions in accordance with unions and national regulations.

Maintenance

Please see our Maintenance & Care instructions at

Gliders

Felt gliders installed as standard
Plastic gliders available upon request.

Variants

Offered in Oiled Oak or Fumed Oiled Oak wood finishes and possible to order in custom sizes.

Materials, Process and Finishing

Each piece blends precision and tradition: components are milled using modern CNC technology and then meticulously hand-finished. Traditional joinery ensures structural integrity, while gradual, hand-sanding bestows a silky surface. Finally, the wood is protected with a clear oil that enhances durability and preserves its natural charm and repairability.

Fumed Oak Process

For a deeper tone, the oak undergoes a traditional fuming process, where it is exposed to a small amount of ammonia vapors in a sealed environment for 20 hours. This reaction with the wood's natural tannins enhances the grain structure and deepens the color. As a natural, non-surface-based treatment, no dyes are used, preserving the wood's authentic character. Variations in hue may occur depending on the tannin content of each piece.

Craftsmanship Statement

We support and foster the Danish cultural heritage of craftsmanship by preserving and advancing the traditional techniques nurtured in our family workshop since **This commitment reflects** both the preservation of the craft and its evolution through the integration of new techniques, innovation, and design development.

The table is shipped in a flat pack.

Description

The Jari Dining Table, designed in collaboration with OEO Studio, embodies the serene beauty of Japanese design while honoring the heritage of Danish craftsmanship. The gently tapering legs create a light, floating appearance that contrasts elegantly with the substantial tabletop. It adapts seamlessly to both residential and hospitality interiors. Its harmonious form, refined materials, and thoughtful execution make it a timeless centerpiece designed to endure.
