Oak, Oiled
AVCL-OOL-02

Fumed Oak, Oiled
AVCL-OFU

Dimensions

Height	750 mm
Width	670 mm
Seat Depth	650 mm
Seat Height	370 mm
Box	740 x 720 x 800 mm
Weight	15 kg

Responsibility

At Brdr. Krüger, sustainable product lifecycle considerations are at the heart of everything we do with focus on benefits for the environment, workers, and end-users. We source high-quality materials from certified sustainable forest management. The manufacturing processes run on low-emission hydropower and waste-to-energy solutions, achieving a near carbon-neutral effect and minimizing our reliance on fossil fuels. Our commitment to traditional craftsmanship and durable design ensures that our furniture is not only timeless but also built to last, contributing to sustainability for future generations.

Test and Certification

This chair has been tested for strength, durability, and safety through independent third-party verification in accordance with **EN Level 2, making it suitable for extreme use. The wood is sourced from sustainably managed forests and certified by PEFC through independent third-party verification.**

Meeting Regulations

The Clear Oil features a low VOC content and is fully compliant with EU regulations. This product contains no biocides, ensuring a natural and environmentally responsible finish. Worker safety is a high priority, with all processes conducted under controlled conditions in accordance with unions and national regulations.

Maintenance

Please see our Maintenance & Care instructions at

Gliders

Felt gliders installed as standard
Plastic gliders available upon request.

Variants

Available in two wood colors: Oiled Oak and Fumed Oiled Oak.

Materials, Process and Finishing

Handcrafted from solid European oak, the chair features a wide, embracing frame with handwoven paper cord detailing on the seat and backrest. Built using Brdr. Krüger's expert joinery techniques. Each piece is hand-assembled and carefully hand-sanded in gradual steps to achieve a soft, refined surface. A clear oil finish is applied, enhancing the oak's natural beauty while ensuring durability and ease of maintenance.

Fumed Oak Process

For a deeper tone, the oak undergoes a traditional fuming process, where it is exposed to a small amount of ammonia vapors in a sealed environment for 20 hours. This reaction with the wood's natural tannins enhances the grain structure and deepens the color. As a natural, non-surface-based treatment, no dyes are used, preserving the wood's authentic character. Variations in hue may occur depending on the tannin content of each piece.

Craftsmanship Statement

We support and foster the Danish cultural heritage of craftsmanship by preserving and advancing the traditional techniques nurtured in our family workshop since 1852. This commitment reflects both the preservation of the craft and its evolution through the integration of new techniques, innovation, and design development.

Description

The ARV Lounge Chair continues the ARV collection's legacy of refined craftsmanship and modern expression. Designed to offer generous comfort without compromising on elegance, it brings a sense of understated luxury to both private and public interiors. Its sculptural silhouette and organic curves reflect a deep respect for traditional Danish design, while inviting relaxation and ease.
