Fumed Oak, Oiled
JAJ1-OFU

Dimensions

Diameter	Ø450 mm
Height	450 mm
Table Top Thickness	25 mm
Box (top)	470 x 470 x 40 mm
Box (legs)	470 x 160 x 110 mm
Weight	5 kg

Responsibility

At Brdr. Krüger, sustainable product lifecycle considerations are at the heart of everything we do with focus on benefits for the environment, workers, and end-users. We source high-quality materials from certified sustainable forest management. The manufacturing processes run on low-emission hydropower and waste-to-energy solutions, achieving a near carbon-neutral effect and minimizing our reliance on fossil fuels. Our commitment to traditional craftsmanship and durable design ensures that our furniture is not only timeless but also built to last, contributing to sustainability for future generations.

Test and Certification

The wood is sourced from sustainably managed forests and certified by PEFC through independent third-party verification.

Meeting Regulations

The Clear Oil features a low VOC content and is fully compliant with EU regulations. This product contains no biocides, ensuring a natural and environmentally responsible finish. Worker safety is a high priority, with all processes conducted under controlled conditions in accordance with unions and national regulations.

Maintenance

Please see our Maintenance & Care instructions at

Gliders

Felt gliders installed as standard
Plastic gliders available upon request.

Easy Assembly

The table is delivered in a flat pack for efficient shipping and handling, and is designed for easy, tool-free assembly.

Variants

Jari Low table collection consists of six different sizes and heights, variations, ranging from Ø45 cm to 180 cm in length, the tables are crafted from solid oak and come in oiled or fumed finishes.

Materials, Process and Finishing

Handmade in Denmark, each table combines traditional joinery techniques with modern technology, ensuring durability and lasting quality. The surfaces are hand-sanded in gradual steps to achieve a smooth, tactile finish, and a natural wax oil is applied to protect the wood while preserving its inherent beauty.

Fumed Oak Process

For a deeper tone, the oak undergoes a traditional fuming process, where it is exposed to a small amount of ammonia vapors in a sealed environment for 20 hours. This reaction with the wood's natural tannins enhances the grain structure and deepens the color. As a natural, non-surface-based treatment, no dyes are used, preserving the wood's authentic character. Variations in hue may occur depending on the tannin content of each piece.

Craftsmanship Statement

We support and foster the Danish cultural heritage of craftsmanship by preserving and advancing the traditional techniques nurtured in our family workshop since 1852. This commitment reflects both the preservation of the craft and its evolution through the integration of new techniques, innovation, and design development.

Description

The Jari Low Table blends sculptural elegance with functional adaptability. The tables reflect the organic forms of stones smoothed by waves over time, which fluid design and soft, rounded edges introduce a sense of calm and timelessness to any interior. The narrowing profiles of the legs create a floating appearance, enhancing their organic shape. Whether used individually or grouped, the Jari Low Tables offer versatility for various settings, from private residences to hospitality spaces.
