Dimensions

Height	680 mm
Width	680 mm
Seat Depth	430 mm
Seat Height	420 mm
Box	740 x 720 x 800 mm
Weight	15 kg

Responsibility

At Brdr. Krüger, sustainable product lifecycle considerations are at the heart of everything we do with focus on benefits for the environment, workers, and end-users. We source high-quality materials from certified sustainable forest management. The manufacturing processes run on low-emission hydropower and waste-to-energy solutions, achieving a near carbon-neutral effect and minimizing our reliance on fossil fuels. Our commitment to traditional craftsmanship and durable design ensures that our furniture is not only timeless but also built to last, contributing to sustainability for future generations.

Test and Certification

The wood is sourced from sustainably managed forests and certified by PEFC through independent third-party verification.

Meeting Regulations

The Clear Oil features a low VOC content and is fully compliant with EU regulations. This product contains no biocides, ensuring a natural and environmentally responsible finish. Worker safety is a high priority, with all processes conducted under controlled conditions in accordance with unions and national regulations.

Maintenance

Please see our Maintenance & Care instructions at

Gliders

Felt gliders installed as standard
Plastic gliders available upon request.

Variants

Available in two wood finishes—Oiled Oak and Fumed Oiled Oak. The upholstery selection includes a wide range of premium leathers and fabrics, with the option to specify bespoke materials for a fully customized expression.

Materials, Process and Finishing

Crafted from solid European oak with a waxed-oiled finish, the chair showcases the natural beauty of the wood, enhanced by meticulous hand-finishing techniques. The seamless integration of the backrest and frame is achieved through traditional woodturning methods combined with modern manufacturing techniques.

Fumed Oak Process

For a deeper tone, the oak undergoes a traditional fuming process, where it is exposed to a small amount of ammonia vapors in a sealed environment for 20 hours. This reaction with the wood's natural tannins enhances the grain structure and deepens the color. As a natural, non-surface-based treatment, no dyes are used, preserving the wood's authentic character. Variations in hue may occur depending on the tannin content of each piece.

Craftsmanship Statement

We support and foster the Danish cultural heritage of craftsmanship by preserving and advancing the traditional techniques tured in our family workshop since This commitment reflects both the preservation of the craft and its evolution through the integration of new techniques, innovation, and design development.

Upholstery

Description

The upholstered seat merged with the oak frame provides both comfort and durability. This fusion results in a sculptural form that is both bold and inviting, reflecting the chair's commitment to functional elegance. Ferdinand Lounge Chair stands as a testament to enduring design and quality craftsmanship, suitable for both residential and commercial interiors.
