Dimensions

Diameter	Ø1350 mm
Height	720 mm
Hardened Glass Thickness	10 mm
Box (glass)	1360 x 1360 x 35 mm
Box (legs)	860 x 860 x 800 mm
Total Weight	55,5 kg

Responsibility

At Brdr. Krüger, sustainable product lifecycle considerations are at the heart of everything we do with focus on benefits for the environment, workers, and end-users. We source high-quality materials from certified sustainable forest management. The manufacturing processes run on low-emission hydropower and waste-to-energy solutions, achieving a near carbon-neutral effect and minimizing our reliance on fossil fuels. Our commitment to traditional craftsmanship and durable design ensures that our furniture is not only timeless but also built to last, contributing to sustainability for future generations.

Test and Certification

The wood is sourced from sustainably managed forests and certified by PEFC through independent third-party verification.

Meeting Regulations

The Clear Oil features a low VOC content and is fully compliant with EU regulations. This product contains no biocides, ensuring a natural and environmentally responsible finish. Worker safety is a high priority, with all processes conducted under controlled conditions in accordance with unions and national regulations.

Maintenance

Please see our Maintenance & Care instructions at

Gliders

Felt gliders installed as standard
Plastic gliders available upon request.

Easy Assembly

The TRIIO Table is delivered in a flat pack for efficient shipping and handling, and is designed for easy, tool-free assembly. The glass tabletop features integrated magnetic elements that align seamlessly with the solid wood base, ensuring precise positioning and complete stability.

Variants

Offered in two refined wood finishes—Oiled Oak and Fumed Oiled Oak—paired with either a clear or tinted glass tabletop.

Materials, Process and Finishing

The sculptural base is made from solid European oak, shaped through advanced CNC milling and meticulously hand-finished to ensure both structural integrity and refined detailing. Each table is assembled using traditional joinery techniques, enhancing durability and longevity. The wooden surfaces are hand-sanded in gradual steps to achieve a smooth, tactile finish, and treated with a wax oil that protects the oak while allowing its natural character to shine through.

Fumed Oak Process

For a deeper tone, the oak undergoes a traditional fuming process, where it is exposed to a small amount of ammonia vapors in a sealed environment for 20 hours. This reaction with the wood's natural tannins enhances the grain structure and deepens the color. As a natural, non-surface-based treatment, no dyes are used, preserving the wood's authentic character. Variations in hue may occur depending on the tannin content of each piece.

Craftsmanship Statement

We support and foster the Danish cultural heritage of ship by preserving and advancing the traditional techniques nurtured in our family workshop since 1852. This commitment reflects both the preservation of the craft and its evolution through the integration of new techniques, innovation, and design development.

Description

The harmonious blend of natural wood and transparent glass creates a visual lightness, allowing the intricate craftsmanship of the base to take center stage. The table's minimalist yet expressive design embodies a poetic balance between simplicity and sophistication, reflecting Bølling's original vision. Its distinctive base evokes the organic form of branching trees, supporting a clear or tinted glass tabletop that appears to float above.
