Material

Solid beech, beech veneer, Fenix Nano laminate.
 This product has not been treated with any biocides.

Production process

The solid beech frame is cut using a CNC machine. The frame is assembled using both glue and bolts with threaded inserts. The table top for both finishes is laminated and glued to an MDF core. It is then trimmed to size and solid wooden edging is glued around the border. The drawers are made from beech veneer and solid beech cut using a CNC machine, and glued together with traditional woodwork joinery.
