## CLEANING INSTRUCTIONS

### *Suede*

If you have a leather item with some marks or stains use a dry, soft bristled brush to remove loose debris from the surface of the leather. Do not focus on one area, but rather a complete wipe down moving quickly and evenly.

### *Powder coated Buffed Aluminum*

Use a dry soft cloth to gently go over marks until clean. Do not apply pressure on persistent marks. Remove them using repeated gentle motions and by reapplying with some clean water if necessary. Please note all of our metal products have a clear powdercoat for further protection. Do not use brass cleaners or abrasive pads as they will remove the finish.

## handmade in los angeles

Every effort is made to ensure an accurate representation of product colours, finishes and dimensions, but due to the handmade nature of this product, there may be a slight variation.
