MOON / TABLE,
Paola Navone

A bold combination of materials distinguishes the Moon table: the blue ceramic base in the shape of an amphora, characterised by an irregular material surface obtained with a particular hand finish, is combined with a rectangular top available in two sizes made in white Carrara marble.

The Carrara marble tops are finished with protective coatings, that never make the surface impervious, but are useful to slow down absorption of liquids. Cleaning: use water and a neutral detergent on the surface. Avoid direct contact with aggressive chemicals substances, solvents, ammonia, inks, oily soaps, lemon, wine, coffee. In case of contact, rinse the surface immediately and thoroughly. Ceramic products, highly handcraft made, from Indo-China, are made of glazed terracotta. Depending on the temperature level, and their exposure to the light and air during the manufacturing process, their colour can vary considerably. Due to the peculiarity of the product, a vast tolerance range has been established for the presence of plasters, repairs and scratches as well as in terms dimensions, colour and surface, which can be quite irregular. Due to technical-productive reasons linked with the artisanship of the products, the lower side, for approximately 1,5 cm in height, can sometimes be irregular and without glazing. White Carrara marble: A naturally compact material, wear and tear resistant, suitable for dining purposes, Carrara marble is treated with a

clear matt protective impregnating agent. The presence of micro holes or imperfections is to be considered an intrinsic characteristic of the natural product, claims are not accepted. For the correct maintenance, we suggest to promptly remove any stains from the surface, especially acid substances.
