Kula Chest of drawers

PRODUCT NAME

Kula Chest of drawers

DESIGNER

Michele De Lucchi

YEAR OF DESIGN

2022

Kula is a collection of wooden drawer chests based on a design idea of creating building blocks with woodcarving. The designer/architect, Michele De Lucchi, has found a brilliant way to create a world of architectural objects by creating magnificent patterns with simple handcarved grooves which flawlessly envelop the chests to create unique three-dimensional sculptural edifices. The interplay of perpendicularly positioned groove blocks creates a beautiful pattern, while the hand-carved grooves give the chests the warmth and tactility of handmade objects.

The name Kula in Bosnian means tower, fortification, building, home. The powerful idea of building blocks enables the creation of an architectural world built with Kula's off different sizes and proportions. The tall Kula consists of two drawer chests and a small cabinet mounted on top of each other. The chests and the cabinet can also serve as independent units. Other sizes will be added to the Kula family at a later stage.

* Product weights are approximate and vary based on wood species. Different wood densities affect overall weight, even within the same species. If only one weight is shown, it represents the average for maple, ash, and walnut—maple and walnut are similar, while ash is 4% heavier. Oak's weight can be estimated by adding 11% to the net weight. These variations may impact handling, transport, and usage.
