

KUBIS MIRROR

The Kubis Mirror transforms a functional object into a sculptural presence.

A slender rectangular plane rises through a precise cut in a solid limestone base, creating a quiet dialogue between reflection and stone. The limestone's tactile, hand-carved sides reveal subtle irregularities that speak to the hand of the maker, adding depth, texture, and a raw natural beauty. These softened edges draw the eye, framing the mirror not merely as a surface, but as a focal point of material contrast.

An adjustable bolt concealed at the back allows the mirror to tilt gently, offering perfect alignment with your space and your perspective. Placed on a console, dresser, or sideboard, the Kubis Mirror brings a calm, architectural presence to the room. Standing freely, Kubis becomes both object and artwork, where minimal design meets architectural poise, inviting moments of reflection as well as admiration.
