Constellation - Three Rings

Exceptional craftsmanship. Unlike anything else.

The sculpture is inspired by a constellation, where each porcelain ring is like a star in the night sky. When looking at the rings individually, they appear random and disconnected - the eyes dance without coming to rest on a single focal point. But stepping back and viewing the sculpture as a whole, it comes together into something cohesive and beautiful.

The sculpture can cast gentle candlelight on a dining table or brighten an entire room.

Round

We recommend that Constellation sculptures be mounted 70" AFF or higher, to show the beautiful underside of the rings rather than straight on the side profile.
