THE PROBLEM

MY CHILD'S FALLING BEHIND WHAT DO I DO?

Academic performance is in decline Globally.

Parents are seeing:

- Unexplained Sudden drops in grades
- Stress and anxiety for both child and parent
- Students being held back
- Students performing well on coursework but poorly on exams
- Parents spending unreasonable hours on homework
- Students forgetting what they were just taught

“””

PARENT ISSUES

I have to spend almost 3 hours to get work done that should take 30 minutes. I need help. Student support from the government is few and far between

“””

GUIDANCE COUNSELLOR ISSUES:

Sometimes it takes us weeks before we can get back to a student. We love working with the children but we need more support.

“””

TEACHER ISSUES

Trying to get students to pay attention in class in a struggle. Sometimes almost half the time is stopping disruptions. These children need to focus. The fighting is another story by itself.

It monitors academic and focus performance frequently and only activates intensive support when needed—making it more affordable, responsive, and reliable than hiring a tutor after grades drop.
