

Product Summary

Part 1 : Dimensions

Width	Aus Timber Designs: 182 Oak Designs: 228	mm
Length	1524	mm
Total Thickness	5	mm
Wear Layer	0.7	mm
Boards Per Box	6	planks
Box Size	Aus Timber Designs: 1.664 Oak Designs: 2.084	sqm

Part 2 : General Data

Core Type	PVC Vinyl with Fibre-Glass Mesh
Wear Layer	0.7mm
Finish	Matte Light Embossed
Installation Method & Adhesives	Full trowel installation (refer to installation guidelines) F. BALL F44 Styccobond Adhesive F. BALL F58 Styccobond Adhesive F. BALL F48 PLUS - High Temperature (for areas of high temperature variation and areas with exposure to sunlight) FLOOR+ F2000 Vinyl & Resilient Adhesive
Surface Coat	UV-cured Lacquer (with anti-stain coat)
Box Weight	182mm Wide Planks: 16.1KG 228mm Wide Planks: 20.1KG
Profile	Micro Bevel

Pattern Repeat	12 - 15 Pure Unique 72 - 90 Unique Prints (with pattern shifts down the plank) Note: This is approximately triple the standard unique prints available on a vinyl floor, showcasing greater print and colour variations.
-----------------------	---

Part 3 : Warranty

General Residential	25	Years
Commercial	By Application	Years

Part 4: Wet Pendulum Slip Test (AS 4586-2013)

Australian Wool Testing Authority Ltd - trading as AWTA Product Testing
A.B.N 43 006 014 106
1st Floor, 191 Racecourse Road, Flemington, Victoria 3031
P.O Box 240, North Melbourne, Victoria 3051
Phone (03) 9371 2400

TEST REPORT

Client : Everfloor
2A 87 Allingham Street
Condell Park NSW 2200

Test Number : 25-000866
Issue Date : 2/04/2025
Print Date : 2/04/2025

**AS 4586-2013
Appendix A**

**Slip Resistance Classification of new Pedestrian Surface Materials
Wet Pendulum Test Method**

Date of Testing	01-04-2025					
Operator	AWTA Test Operator 14					
Test Temperature (20±5degC)	25 °C					
Specimens Washed with pH Neutral Detergent then dried						
Test Direction	Length					
Fixed/Unfixed	Unfixed					
Slider No 96 Batch No	33					
Length	1	2	3	4	5	SRV
British Pendulum number	34	35	38	37	38	36
Classification	P3					

Equipment: Cooper Pendulum Skid Tester Serial No: 1433-01 Calibrated 11/10/2023
Slider prepared using P400 and 3µm lapping film.

These results apply only to the specimens tested and it is recommended that before selection of flooring or paving materials the effect of service conditions, including maintenance and wear on their slip resistance be checked.

Test Number : 25-004545
Issue Date : 25/11/2025
Print Date : 4/12/2025

AS ISO 9239.1-2003

Reaction to Fire Tests for Floorings. Determination of the Burning Behaviour using a Radiant Heat Source

Date of Sample Arrival	21-10-2025			
Date Tested	25-11-2025			
CHF Value	1	2	3	Mean
Length	9.6	9.5	9.5	9.5 kW/m ²
Width	9.9	-	-	- kW/m ²
Smoke Value	1	2	3	Mean
Length	131	165	141	146 % .min
Width	142	-	-	- % .min
Observations:				
Melting				Yes
Blistering				Yes

Sample was conditioned in accordance with BSEN 13238:2010 at a temperature of 23±2°C and relative humidity of 50±5% for a minimum of 48 hours prior to testing.

Each specimen was adhered to a substrate of 6mm thick fibre reinforced cement board using Roberts 656 adhesive and clamped prior to testing.

HF30 not reported as flame out time occurred before 30 minutes.

The test results relate to the behaviour of the test specimens of a product under the particular conditions of the test, they are not intended to be sole criterion for assessing the potential fire hazard of the product in use.

Results in accordance with section 8.4 have not been included in the report. They are available upon request.

Definitions of Noise Metrics

FIIC: Field Impact Insulation Class is a single-number rating of how well a floor system attenuates impact type sounds, such as footsteps. Calculated from third-octave band normalised impact sound pressure level data and referenced to 10 m² as described in ASTM E989. The higher the single-number rating, the better its impact insulation performance.

L'nt,w: The Weighted Standardised Impact Sound Pressure Level when measured in situ referenced to a reverberation time (RT60) of 0.5 seconds. Used by the AAAC to determine their respective Star Rating.

CI: Spectrum adaption term is a low frequency correction factor. Typically for massive floors such as concrete, the values are about zero while for timber joist floors CI is positive because of the low resonant frequencies. Considers frequency range between 100 -and 2500 Hz.

CI(50-2500): Same as above, but for the frequency range 50 -2500 Hz.

CI(125-2000): Same as above, but for the frequency range 125 -2000 Hz.

AAAC Star R.	2	3	4	5	6
L'nt,w	65	55	50	45	40
FIIC	45	55	60	65	70

Acoustic test results provided are only indicative of acoustic performance and are site specific, so outcomes may vary from building to building. Everfloor provides this information for guidance and indicative purposes only and does not guarantee any specific acoustic outcome. Indicative testing has been completed by acoustic engineers according to AS/NZS ISO 140.7:2006 and the rating has been determined as per AS ISO 717.2-2004.

Please visit everfloor.com.au for the most up-to-date version of Warranty, Installation, and care and maintenance guidelines. All technical data and testing are based on random sampling and are for indicative purposes only. Version: August 2025
