

Telecommunication Engineering

Who We Are

For 50 years, the WT Group has offered a growing client base with full-service engineering, design and consulting services. WT Group's Telecommunication Engineering team builds networks that drive success, growth and profitability.

With our group in both the wireless and Outside Plant Engineering (OSP) space, we can design wireline and wireless solutions supporting a broad range of business communication and network requirements. Our goal is to always deliver quickly, cost-effectively and with an emphasis on quality to meet every customer's objective.

WT Group's Telecommunication experts have helped clients execute all forms of network installations with a commitment to customer service and quality.

Deliver drawings, plans, and specifications to prepare communication installation projects from permitting to construction

End-to-end project management services; from zoning and FAA approval to site observations and project construction

In-house staff provides services for carrier network coverage expansion, resulting in faster delivery and completion

Services Provided

A/E Engineering
Utility Coordination
Construction Management
Third-Party Services

Types of Projects

END USERS

- Macro Sites
- Small Cells
- Distributed Antenna Systems (DAS)
- Equipment Upgrade and Additions
- Outside Plant Engineering (OSP)
- Fixed Wireless

WIRELESS CLIENTS

- The Major Cellular Providers
- Regional Cellular Providers
- Tower Companies
- Original Equipment Manufacturers (OEM)
- 3rd Party Turn-Key Providers ("Turfing Vendors")
- Broadcast Providers
- Government Entities

SPECIALTIES

- Structural Engineering
- Civil Engineering
- Electrical/Mechanical Engineering (MEP)
- Outside Plant Engineering (OSP)
- Land Surveying

WT Group's Telecommunication Engineering team delivers a full spectrum of wireline and wireless communication capabilities designed to help organizations connect with the world.

OUR PROMISE

Knowledge and Experience

We bring years of knowledge and seasoned experience to every project. Completing an average of 2,000 projects a year, our team knows the technology and equipment used by every major wireless carrier in the country. That knowledge allows us to begin projects immediately for our clients, without ramp-up time.

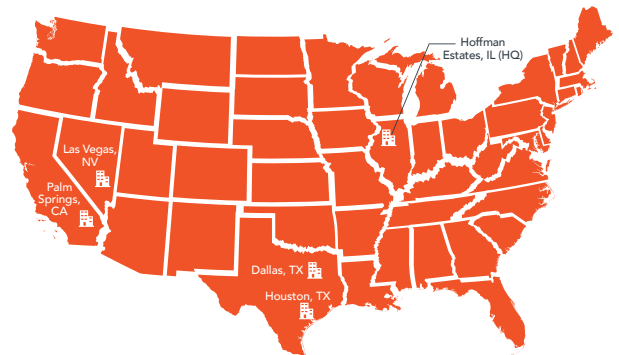

Quality and Trust

Our cutting-edge tools and expertise assure every client that only the best equipment and materials will be utilized in the implementation of a design plan.

Performance and Support

We offer a wide range of telecommunication services to our clients designed to maximize support, control costs, and achieve aggressive deadlines. With a focus on the timely completion of intricate project details, our team achieves project speed and efficiency that is unique in the industry.
