GOIZPER GROUP

HISTORY

GOIZPER S. Coop was created in 1959 in the Gipuzkoa town of Antzuola, part of the European industrial cooperative movement that developed in Mondragón.

Located in the most industrialized and technological area of Spain, GOIZPER has an advanced communications infrastructure.

Thanks to its extensive experience, and technological investment, along with continual effort, consistency and team work, the cooperative has become the most consolidated group in the international market for spraying and power transmission.

GOIZPER combines the objectives of a business company with the methods and values of a cooperative, creating employment, personal and professional development in its employees, as well as development of its social surroundings.

Currently GUIBE is part of the industrial business of GOIZER GROUP.

“The most valuable asset:
our people”

PRESENT

The extensive growth of GOIZPER has turned it into a structured Group based on different businesses whose activities carried out in facilities measuring over 35,000m².

There are currently three businesses:

GOIZPER INDUSTRIAL

Technological benchmark leader in **design, manufacturing and sales of differential solutions for power transmission and automation** for application in a variety of sectors: metalforming, automotive, aeronautics, packaging, construction, shipbuilding, tools-machinery, Rubber, plastic, mining...

GOIZPER SPRAYING

Experts in the design, manufacturing and sales of **manual sprayers and dusters** offering treatments for sectors such as Agriculture, Gardening, Industry, Construction, Cleaning, Pest Control and Disease Control, etc. **Matabi, IK and Micron** are our most prestigious brands.

GOIZPER BIOTECHNOLOGY

Specialists in research, development, creation and sales of **biocide products and advanced formulas**, GOIZPER develops differentiated solutions that are both efficient and sustainable, for problems such as crop plagues and environmental and food health issues, always respecting the environment.

“Our strategy:
Growth through cooperation
Keeping products and business
moving forward”

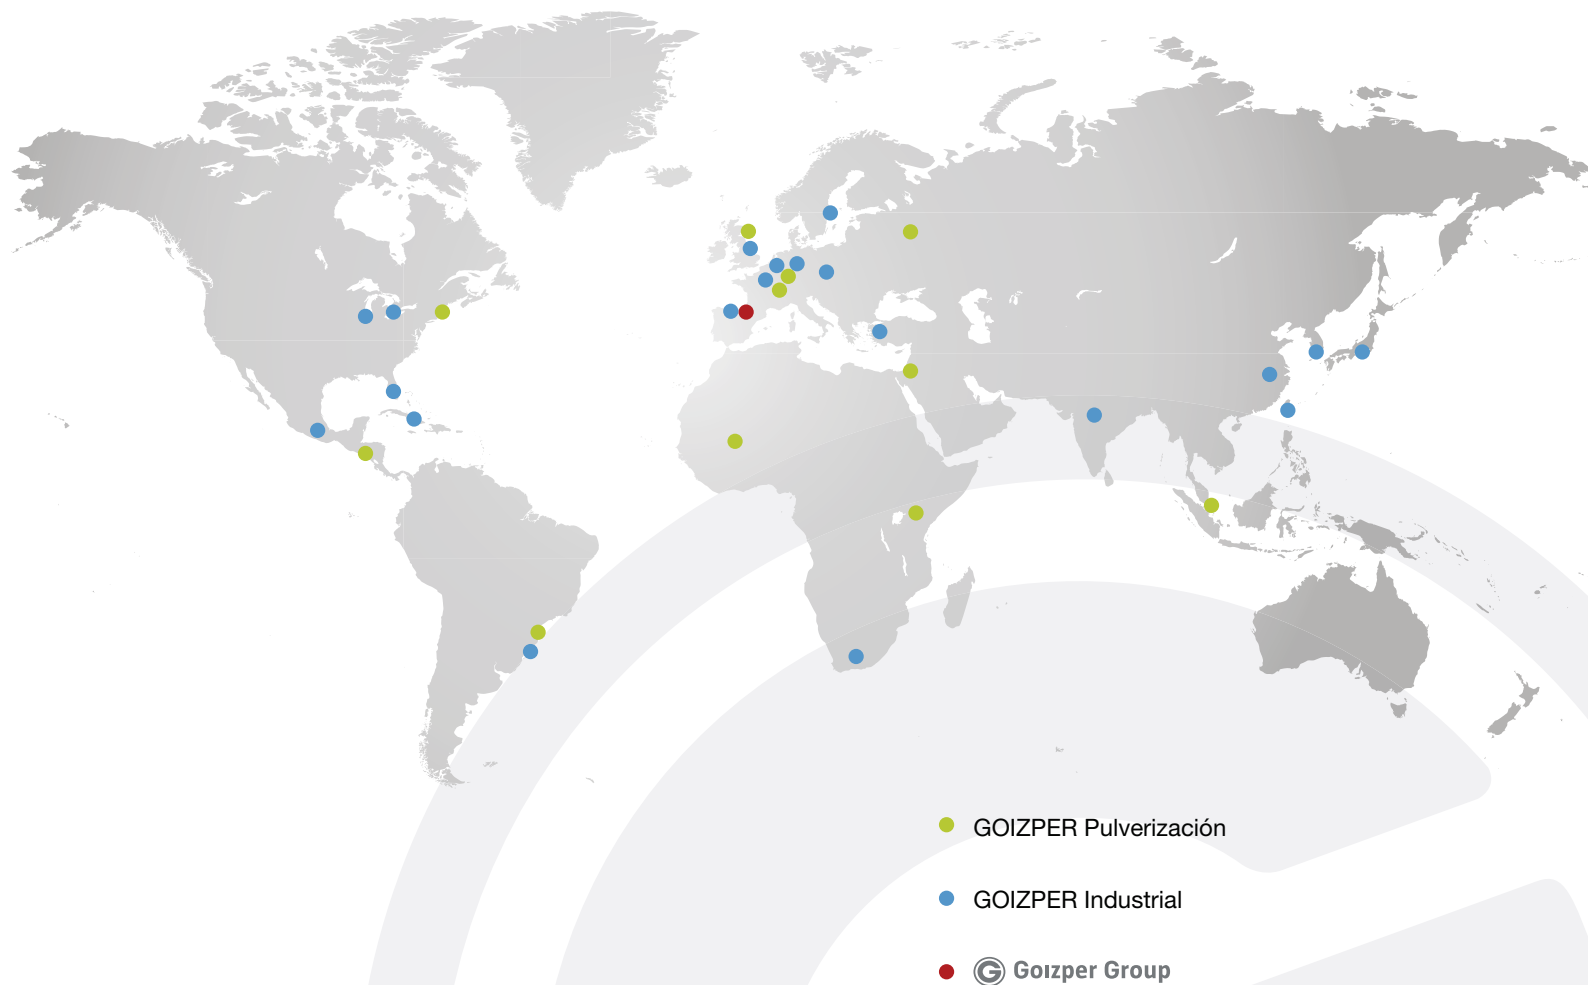

“All over the world”

“Close to the customer”

GLOBALIZATION

Given the importance of providing for an ever-more global market, GOIZPER has developed its own delegations in 5 continents as well as an extensive international sales and distribution network, guaranteeing rapid attention and response across the world.

“GOIZPER provides tailored solutions to each customer”

“Working
towards
our common
future”

GOIZPER INDUSTRIAL

GOIZPER Industrial is one of the leading technological companies offering differential and global solutions in Power Transmission Components (Brakes, Clutches, Clutch-brakes, Index Drives, Camshafts, Lifting devices, etc.).

Continuous **research, innovation and a focus on quality** form the basis of the GOIZPER-GUIBE philosophy, resulting in a highly differentiated product range.

With **reliable, personalized and adaptable design** that is based on customer needs, GOIZPER and GUIBE is a top benchmark company in the market.

GOIZPER range of products

- **Index Drives:**

Based on Flat, cylindrical, globoid and special execution cams, according to the customer needs. For use in sectors such as: welding, packaging, automotive, aeronautics....

- **Planetary Gears Systems:**

Responding to power transmission needs with more compact units than those commonly found on the market and offering advantages such as reduced energy consumption and assembly time; improved production and speed; lower inertia of reducer set and increased dynamism.

- **Brakes, Clutches, CLUTCH-BRAKES:**

Pneumatics, Hydraulics, Electromagnetics, Mechanics are the key solutions that form part of the machinery in different sectors, such as metal cutting and metalforming with presses, shears, servo presses, folding machines, etc.

GUIBE range of products

- **Reducers, Gears, Mechanical jacks, Coupling joints.**

- **Planetary gearbox**

For industrial applications in sugar cane, cement, rubber and all types of industries. As planetary gearbox manufacturers, at GUIBE we feature a high quality, modular design, with high energy efficiency, low noise level, long service life and easy access for maintenance.

GOIZPER

IN POWER TRANS

“Our guarantee:
excellent
quality system”

INNOVATION

GOIZPER Industrial has its own Technological Research, Development and Innovation Department – from where value through technological research studies is generated and efficient and sustainable innovation carried out.

It comprises a large technical team, focused on implementing solutions and research projects in collaboration with the different target sectors. It develops products with both its own technology and new information technologies applied to production processes, improving functionality and flexibility.

The study and analysis of power transmission elements by friction, gearing mechanisms and cam mechanisms is a key objective for Goizper-Guibe.

The evolution of the products to Industry 4.0 developing cyber-physical systems (smart components) based on our knowledge and experience improve the efficiency and production capacity of the components themselves, as well as the remaining useful life and profitability of the equipment in which they are installed.

Goizper Industrial participates in various projects, including the H2020 European programme.

Goizper-Guibe also offers customers a customised test bed service, proactive maintenance and operation simulations of prototypes developed and adapted to its production systems.

“Our goal:
Improvements on new trends
and technologies”

OUR TECHNOLOGY

GOIZPER has its own qualified production team, an important competitive advantage that offers an increased degree of autonomy and flexibility.

This strong investment in machinery and manufacturing programs, improvement and optimization of production lines assures that the GOIZPER equipment is in compliance with the highest levels of quality as demanded by customers.

“Manufacturing integrated with high-tech production systems”

PROCESSES. PHILOSOPHY

LISTENING

Essential in order to offer the appropriate response is the ability to **listen to and understand customer needs.**

GOIZPER **collaborates,** offering the most profitable and competitive product solutions..

SERVICE

GOIZPER's Technical Assistance Services offer solutions and products manufactured ad-hoc for customer's machinery.

It provides replacement parts and offers diagnostic and maintenance services for its products across the world.

PROJECT DESIGNING

The Engineering Department and the I+D+i team analyzes and works together to develop the best possible solutions, applying their own technology and know-how.

Simulations and test benches ensure that products are top quality, efficient and ready for safe installation in customer facilities.

MANUFACTURING

GOIZPER consistently makes investments in innovation, technology and machinery to respond to the required specifications and manufacture while optimizing costs, in compliance with delivery deadlines and in response to competitiveness.

APPLICATIONS

Thanks to GOIZPER's and GUIBE's technology and know-how, it is able to offer adapted, personalized and flexible solutions to different sectors and markets:

- Welding
- Automotive
- Packaging
- Aeronautic
- Metalforming & Metalcutting
- Machine-Tool
- Construction
- Shipbuilding
- Agriculture and forestry
- Access control
- Lifting and transport
- Rubber and plastic

Special solutions Cams, Lifting equipments...

REDUCERS

Reducers for new projects, according to the specifications of each client or our own design. Made-to-measure reducers, interchangeable with already installed equipment.

GEARS

Cutting (Max.) 5 M Grinding (Max.) 2.8 M

TEETH COUPLING

REDUCER VERIFICATION

Reduce repair-retrofitting service, our own or those of other manufacturers. Includes analysis and redesign for the modernisation and/or upgrading of equipment.
