Nimbus introduces the new 12 series:

All you love, only more.

The evolution of our most successful series.

Nimbus Boats announces the 12 series with significant design updates across all three models: Weekender 12, Tender 12, and Commuter 12. Distinctive new exterior design features, redesigned custom helm seats with enhanced ergonomics and extended aft platform.

"Our owners told us what they loved most. The 12 Series delivers more of exactly that," says Jonas Göthberg, Commercial Director at Nimbus Boats. "These aren't changes for the sake of change. They're refinements that serve ease of use, social connection and time together on the water."

What's new?

1. Striking new exterior design

The extended swim platform with double mould construction offers structural integration with the hull and closer connection to the water. New stainless steel railing combined with new hull decor features the Nimbus logo in polished stainless, giving all models a more distinctive appearance.

2. New helm seats with ergonomic design

Completely reimaged helm seats in custom Nimbus design deliver exceptional comfort for extended time at the helm. Enhanced ergonomics and lateral support mean less fatigue on longer passages.

3. New T-top and side balcony for Tender 12

The completely redesigned, longer and wider, T-top integrates solar panels and acrylic see-through glass sections with sunblock. The T12 now also offers a folding side balcony on starboard side for extend social spaces while at anchor.

More of what our customers already love

The 12 Series builds on the award-winning design introduced with the 11 Series, maintaining the low planning threshold and exceptional seaworthy performance. The air-lubricated twin-stepped hull delivers handling you can trust at 45+ knots speed while running dry and stable in real conditions.

Refinements across all models

Beyond the visible changes - extended swim platform, new helm seats, striking exterior design with stainless steel décor - the entire 12 Series incorporates improvements to ventilation, lighting, sound routing, and serviceability. The new Mercury Joystick Piloting facilitates intuitive system monitoring, with joystick control and integrated bow thruster available across the range with Mercury outboards. Volvo Penta inboards are available on both Commuter 12 and Tender 12, with optional assisted docking package with joystick control. Both systems make close-quarter maneuvering effortless and safe.

The optional hydraulic swim platform for outboard engines brings guests closer to the water and serves as a passerelle when moored. New windscreen wiper systems and updated illumination enhance visibility and ambiance across all models. New aft deck seating arrangement with side

cushions creates additional seating possibilities on the aft sides of the deck, transforming storage areas into comfortable social spaces.

"When something is loved, you don't replace it. You refine it," says Joacim Gustavsson, Chief Designer at Nimbus Boats. "Every change in the 12 Series traces back to how our owners actually use their boats. You might not notice every change at first glance, but you feel them as soon as you step on board, that sense of ease, of everything being exactly where it should be."

Model-specific enhancements

Tender 12: The most comprehensive evolution

The T12 receives the most extensive updates. The new T-top is both wider and longer, providing enhanced shading and giving the T12 a completely new profile. With integrated solar panels and acrylic see-through sections with sunblock, it combines functionality with modern aesthetics. The T12 now features a side balcony on starboard side, extending the social space when at anchor. For the first time, the T12 can be fitted with dual Mercury V10 425hp engines, delivering exceptional performance for those who demand more power.

Weekender 12: Enhanced social spaces

The W12 features the new Targa version with canopy in the style of the iconic Nimbus 32 Ballista, bringing heritage design into modern functionality. The starboard side balcony creates openness and flow for relaxation and entertaining.

Commuter 12: Refined day-boat functionality

The C12's re-designed aft deck offers more usable space with a folding back rest on the aft sofa. The deck salon with galley-up configuration and curtains enhances all-weather capability for year-round use.

Who is the 12 series for?

The 12 Series is designed for experienced boaters who value Scandinavian design, time together, and reliable quality. Whether it's a weekend with family, a day out with friends, extended cruising with those who matter most, or quiet moments at anchor, the 12 Series serves those who appreciate thoughtful design and the freedom to enjoy the water on their own terms.

"Whether the boat is used on the Norwegian West Coast, around the Mediterranean, or on the North American east coast, owners value protected comfort, reliable performance, and thoughtful functional Scandinavian design," says Jonas Göthberg, Commercial Director at Nimbus Boats. "The 12 Series delivers exactly that."

Each model serves its purpose with precision. The Commuter 12 excels as a year-round vessel for long-distance transport, easily transforming from closed to open configuration. The Weekender 12 extends weekend possibilities with enhanced social areas and increased storage for gear and water toys. The Tender 12 remains the versatile walk-around for those who appreciate meticulous design and unlimited possibilities.

All three models provide exceptional freedom of movement and spacious layouts with flexible seating arrangements that have become signatures of the series.

Availability and ordering

The Nimbus 12 Series is available to order immediately through authorized Nimbus dealers worldwide. The boats will make their public debut at Boot Düsseldorf in January 2026. Production begins in Q1 2026.

For more information about the Weekender 12, Tender 12, and Commuter 12, including detailed specifications and configuration options, visit nimbusboats.com or contact your local authorized Nimbus dealer.

About Nimbus Boats

Established in 1968, Nimbus builds boats that meet the requirements of the conscientious boater who appreciates smart functionality, comfort, safety, and Scandinavian design. With a heritage spanning over 50 years, Nimbus has built a reputation for practical elegance, seaworthy performance, and human-centered details. The company's philosophy, "Feel the difference," reflects its commitment to thoughtful design that serves real experiences on the water.

Nimbus Boats is part of Nimbus Group, headquartered in Gothenburg, Sweden, with operations in Scandinavia, Europe, and North America.
