

HOME ENERGY UPGRADE

Nerd Program Selections & Timeline

☐ AC Tune-Up ☐ Brightech (LED light bulbs) <i>Voucher provided via email - shop.nerdpower.energy</i>	TYPICALLY WITHIN 7 DAYS
☐ Smart Shield (Insulation, Duct Seal, Air Seal) ☐ Smart Seal (Aeroseal) ☐ Intellipool (Variable Speed Pool Pump)	TYPICALLY WITHIN 30 DAYS
☐ Main Panel Upgrade <i>If required (Insurance included with Nerd Partner Program)</i>	BETWEEN CAD & PERMIT
☐ Roof Replacement	BETWEEN PERMIT & INSTALLATION
☐ Smart Storage (Battery Storage) ☐ Smart EV (EV Charging)	DURING INSTALLATION
☐ Smart Flow (Solar Attic Fan)	AFTER INSTALLATION
☐ Smart Vision (Production + Consumption Monitoring)	AFTER PV INSPECTION
☐ AC Unit Install ☐ Smart Thermostat ☐ Other:	VARIES BY PROGRAM SELECTION
☐ Pearl Certification + 30 Yr Solar Insure Warranty	AFTER PROGRAMS ARE COMPLETED

PV Solar Steps and Expectations

Site Survey & Roof Inspection

You will need to be home for this appointment in case the surveyor needs access to the attic.

CAD Site Plan

Please watch for an email from us to approve your plans.
Our engineers ensure that your design complies with electrical codes and is optimized for solar production. If your project requires additional work such as roof repair or electrical upgrades or a change order, we will let you know at this stage.

Permit & Utility (& HOA)

You will need to reach out to your HOA.
We will handle the City and Utility. On occasion, these approvals necessitate a change order, which can cause additional delays.

Installation

Please watch for an email or phone call to schedule your installation.
We will contact you to schedule your Solar installation! You will likely want to be home for this appointment (at least for the start and finish.)

Inspection & Close Out

Once your installation is complete, the City/Utility will complete the final inspection of your installation. At this time, we will send a crew out to finish up any remaining work that needs to be done on your project.

Permission To Operate (PTO)

Please watch for your utility to grant you Permission to Operate.
The last step before you can turn on your system is when the utility officially grants you PTO. Some utility companies do not inform us when they are inspecting nor when they have granted PTO, so if you find out before us that you have been granted PTO - let us know!

Commissioning!

With some jurisdictions, this happens simultaneously with PTO, if not we will come out and activate your system for you. Most projects will be ready for commissioning within 90 days!

Available Incentives

You may qualify for Federal or State Tax Incentives*. Please visit the FAQ & Documents section of your customer portal for details.

*Please provide your tax professional with the receipt provided in your customer portal to discuss which incentives you qualify for - **darwin.nerdpower.energy**

Energy Savings

Many homeowners, without realizing it, start to use more energy once their solar system is activated. This will make it difficult to recognize the energy savings solar can offer. We encourage you to continue to live an energy efficient lifestyle for the best savings results....you got this!

Electric Utility Provider

New Utility Rate Plan

Utility rate plans change over time and each utility can have its own unique approach to solar billing. Because of this, any proposed savings can be impacted. Please check with your utility to ensure you are on the best rate plan once your solar system is operational. For tips on understanding your utility bill, visit the “Utility Bill” section of your Customer Portal FAQ.

Welcome to the #nerdfam!

Congratulations! You are officially a Nerd Partner! As we endeavor to make your home smarter, more efficient, and a little nerdier, we need your help during the process to ensure a swift and smooth installation. Thank you!

Things we'll need from you!

- ☐ **Home for Site Survey** Site Survey Date
Our Certified Site Survey technician will need access to your attic and the backyard
- ☐ **Utility/Permit Documents Signed**
Utility providers and some jurisdictions require homeowner signatures to proceed with interconnection/permitting
- ☐ **CAD (Solar Design Permit) Approval via Email**
We'll need your approval for your solar design prior to permitting.
(Auto approves after 24 hours)
- ☐ **Adult present for Install date**
Someone 18+ must be present during solar system installation day(s)
