# DayDream

Full-service dental billing that frees up your time for clinical and patient experience.

Our offerings include thorough insurance verification with customized breakdowns tailored to each office's coding needs, posted back directly to your PMS. We handle the entire claims process, from submission and follow-up to payment posting, aiming to reduce outstanding A/R and improve collection rates. Patient billing is managed through text, email, and traditional mail, ensuring timely payments.

Additionally, DayDream provides detailed analytics to help practices identify and address potential inefficiencies. By integrating AI technology with experienced billing professionals, we alleviate the administrative burden on dental practices, allowing doctors to focus on patient care.

DayDream has been a game changer for our practice. We are a longstanding community practice with new ownership as of 2022, and inherited years of less-than-optimal financial systems. DayDream took over our Insurance A/R and Patient A/R as we could focus on the more patient facing aspects of the practice while rebuilding our systems. It's been such a game changer they have stayed on with our Insurance A/R so we can continue to focus on providing 5-star service to our patients. Highly recommend!

DayDream has completely transformed our dental billing. We used to struggle with payment posting and reconciliation, but now it's all handled easily and accurately by DayDream's accounting team! The best part is that I have full visibility into the work they're doing and how much time/money they're saving my practice.
