Back/Rear Finish

Our standard finish on the back of canvases whilst tidy, shows the staples with the excess canvas left un-trimmed. Standard nylon hanging cord is attached with staples.

Upgrade to our framers finish backing for a pro look. Excess canvas is trimmed and staples covered with framers tape and felt bumpers added to protect walls. Includes premium hanging wire and metal d-rings. Additional \$30 per canvas

File Types, Resolution & Colour Balance

As canvas is a woven textile surface it often effectively masks pixelation and compression artifacts in less than ideal resolution files. Dependant on an images subject matter we can often produce amazing quality canvas from resolutions as low as 72dpi (dots per inch). 300 dpi JPEG or PNGs will produce the highest level of detail perceptible.

Where possible submit original files and try not to reduce or enlarge the file when editing pre submission. Always check your monitor display isn't excessively bright or contrasted, and colour balance is set to normal to get the best indication of the final printed result. Email, call or see us in store to discuss your options.

*Disclaimer: As photo canvas is printed on woven canvas there may be minor irregularities in the surface of the final product. Service times are dependant on workload and/or order size and may be longer during peak periods. Canvas delivery times vary dependant on location and may be longer in remote areas or Western Australia / Northern Territory. We are unable to guarantee exact delivery times - postage is calculated based on weight, size and location. Call ahead to confirm turnaround if you have a deadline to meet.
1st August, 2025 - Supersedes all prior pricing. All prices include GST.
