

Fund Update - April 2026

Portfolio Performance*

As of 30 April 2026 (% , AUD Hedged)

	1 month	3 months	6 months	CYTD	1 year	2 years (p.a.)	Since Inception 19-Sep-2025
Fund Net Return	1.60%	0.01%	1.31%	0.62%	-	-	1.97%
Benchmark [^]	0.34%	0.98%	1.89%	1.28%	-	-	2.31%
Excess Return	1.26%	-0.97%	-0.58%	-0.66%	-	-	-0.35%

* Performance is for the CC Wellington Multi-Sector Credit Fund – APIR: CHN7928AU also referred to as Class A units, and is based on month end unit prices in Australian Dollars. Net performance is calculated after management fees and operating costs. Individual Investor level taxes are not taken into account when calculating performance returns. This is historical performance data. It should be noted the value of an investment can rise and fall and past performance is not indicative of future performance. Date of inception is 19 September 2025.

[^] Benchmark is the RBA Cash Rate Total Return Index. The comparison is displayed as a reference to the target return for the Fund and is not intended to compare an investment in the Fund to a cash holding.

The Fund invests all, or substantially all, of its assets in class S shares of the Underlying Fund, being an AUD denominated share class. The Fund may retain a small portion of its assets in cash or cash equivalents for operational purposes.

Given the CC Wellington Multi-Sector Credit Fund has been in operation since 19 September 2025, to provide investors with a longer term view of strategy performance, the below table shows the net returns for the Underlying Fund in U.S. Dollars. The Underlying Fund has been in operation since 23 December 2015.

Underlying Portfolio Performance (USD)[†]

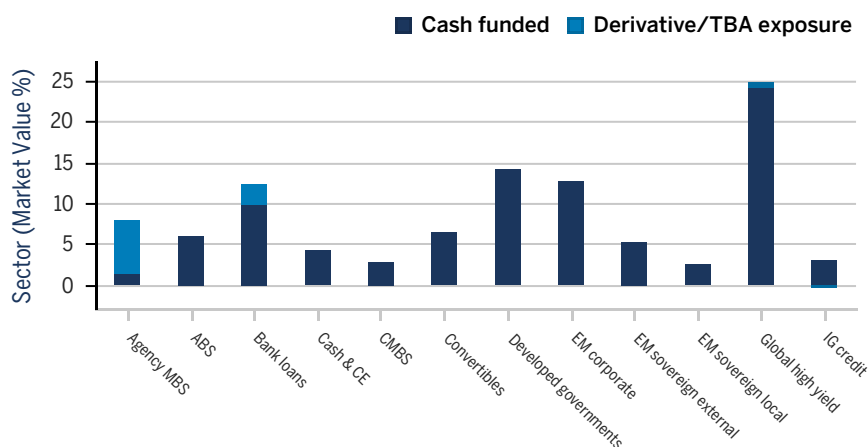

As of 30 April 2026 (% , USD Unhedged)

	1 month	3 months	1 year	3 years (p.a.)	5 years (p.a.)	10 years (p.a.)	Since Inception 23-Dec-2015
Underlying Fund Net Return	1.62%	0.07%	9.88%	9.46%	4.20%	5.95%	6.28%

[†] Performance shown is for the Wellington Multi-Sector Credit Fund USD S Accumulating Unhedged Share Class (LUIIS). The inception date of the USD S Accumulating Unhedged share class is 23 December 2015. | Performance returns for periods one year or less are not annualized. | PAST PERFORMANCE DOES NOT PREDICT FUTURE RETURNS. AN INVESTMENT CAN LOSE VALUE. Underlying Fund returns shown are net of USD S Accumulating Unhedged share class fees and expenses. Underlying Fund returns shown are net of actual (but not necessarily maximum) withholding and capital gains tax but are not otherwise adjusted for the effects of taxation and assume reinvestment of dividends and capital gains. | If an investor's own currency is different from the currency in which the Underlying Fund is denominated, the investment return may increase or decrease as a result of currency fluctuations. | Please note the Underlying Fund has a swing pricing mechanism in place. | If the last business day of the month is not a business day for the Underlying Fund, performance is calculated using the last available NAV.

Underlying Fund Sector Exposure

Market Review

- Renewed inflation concerns and higher energy prices triggered a reassessment of the policy outlook, driving global sovereign yields modestly higher. Fixed Income sectors posted positive returns, as credit spreads tightened despite ongoing geopolitical uncertainty.
- In the US, Treasury yields rose modestly as the Federal Reserve held policy rates unchanged and reaffirmed its focus on inflation control, though a more balanced growth backdrop and the US' status as a net energy exporter helped contain the sell off. In the euro area, performance was mixed, with yields initially rising before a late month rally followed the European Central Bank's decision to hold policy steady. As a result, German bunds were broadly flat while higher yielding peripheral markets, particularly Italy, outperformed on continued spread compression. UK gilt yields also moved higher amid persistent inflation pressures and policy uncertainty.
- High-yield bonds generated positive total returns. Lower quality bonds outperformed their higher quality counterparts, with CCC rated bonds posting the strongest returns, followed by B and BB rated bonds. Bank loans generated positive returns for the month, and like high-yield bonds, lower quality loans outperformed their higher quality counterparts. Emerging markets (EM) external debt generated positive returns – spread narrowing aided performance, while an increase in US Treasury yields weighed on results.

Underlying Fund Performance and Attribution

- The Underlying Fund generated a positive return during the month of April.
- The Underlying Fund's allocation to EM debt was one of the top positive contributors to overall performance. EM corporate exposure added to the Underlying Fund's results, with positive contributions from high yield issuers across financial, industrial, and utilities sectors. EM sovereign and local debt also aided the Underlying Fund's results, benefiting from tighter spreads though partially offset by headwinds from interest rate movements.
- Positioning within global high yield was the largest positive contributor to the Underlying Fund's performance, driven primarily by financial institutions and industrials, alongside a positive result from high yield credit index derivative exposure utilised for beta management purposes. An allocation to bank loans industrial and financial issuers also aided April performance, supported by the sector's floating rate characteristics. An allocation to convertible bonds was also beneficial for the Underlying Fund's performance, led by capital goods and semiconductor sectors.
- Within developed governments, US Treasury exposures, including derivatives and nominal Treasury holdings, and non US developed government exposure hurt the Underlying Fund's results as yields moved higher. An allocation to Treasury Inflation-Protected Securities (TIPS) provided a partial offset against the drag.
- Securitised sectors contributed positively to the Underlying Fund's monthly results. Allocations to agency mortgage backed securities (MBS) and non agency residential mortgage backed securities (RMBS) benefited performance. Commercial mortgage backed securities (CMBS) were broadly flat for the month, while an allocation to Asset Backed Securities (ABS) detracted modestly from the Underlying Fund's results.

Underlying Fund Positioning and Outlook

- Fiscal stimulus, AI investment, deregulation, and accommodative monetary policy continue to underpin growth. However, the impact of these policies is uneven, and political volatility keeps the macroeconomic backdrop unsettled. Inflation has eased but evolving tariff policies add complexity to the outlook. Many firms are positioned to pass higher input costs through to consumers, raising the risk of more persistent inflation.
- The Wellington Management team believes EM country fundamentals are well supported by manageable balance of payment positions, improving fiscal deficits, and supportive commodity prices. Sovereign hard currency spreads appear somewhat tight and therefore the Underlying Fund's EM exposure has been limited to high conviction turnaround stories. Allocations have been made to EM corporate issuers with prudent balance sheet management in select sectors and the team continues to find attractive opportunities in below-investment-grade issuers.
- Within structured finance, the Wellington Management team believes consumer fundamentals remain supportive overall, although deteriorating for the lower income cohort, and anticipates seeing gradual labour market deterioration. The team favours seasoned residential mortgages and remains opportunistic in buying dislocated commercial mortgages and collateralised loan obligations.

Investor Benefits

- Provides diversified credit exposure with daily liquidity, offering a liquid complement to private credit.
- Combines active top-down and bottom-up sector rotation to capture relative value opportunities with minimal market timing risk.
- A one-stop strategy combining professional asset allocation and tactical sector rotation for simplified implementation and oversight.
- The Underlying Fund targets a 7-8% yield* with strong potential for future returns, serving as a tactical replacement for passive equity.

* The Underlying Fund may not be successful in achieving its return objective.

Key Risks and Considerations

Several specific risks are associated with investing in the Fund.

This can include, but is not limited to:

- Market risk
- Capital risk
- Interest rate risk
- Underlying fund risk
- Liquidity risk
- Withdrawal risk
- Credit risk
- Currency hedging risk

Please refer to section 8 of the Product Disclosure Statement for more information about the risks of investing in the Fund.

Underlying Fund Characteristics

Characteristics	
Expected volatility (over a market cycle)	5 – 8% p.a.
Duration	2 – 6 years
Average credit quality	B/BB
Expected Sector Allocation Ranges	(%)
High yield	10 – 60
Bank loans	10 – 50
Emerging markets debt	10 – 40
Securitized debt	10 – 40
Investment grade credit	0 – 20
Developed governments	0 – 20
Convertible and hybrid securities	0 – 10

Market cycle is typically 3 – 5 years. During times of market stress, target volatility may be different from the stated expectation. | Expected sector allocation ranges are based on historical allocation and are not hard guidelines, and may not necessarily be indicative of where we might be positioned in the future. | The Underlying Fund invests in higher yielding sectors of the credit market and has no limitations on the credit quality of individual securities. The average credit quality of the Underlying Fund should be considered an outcome of the investment process and will fluctuate over time but generally should be expected to be B- or higher. In the event of split ratings on a security, the Investment Manager will use the highest rating of Moody's, Standard & Poor's or Fitch. If a security is unrated, then an equivalent credit rating, as deemed by the Investment Manager, may be used. | The characteristics presented are sought during the portfolio management process. Actual experience may not reflect all of these characteristics, or may be outside of stated ranges.

Important Disclosure

Additional performance information

PAST INDEX OR THIRD PARTY PERFORMANCE DOES NOT PREDICT FUTURE RETURNS. There can be no assurance nor should it be assumed that future investment performance of any strategy will conform to any performance examples set forth in this material or that the portfolio's underlying investments will be able to avoid losses. The investment results and any portfolio compositions set forth in this material are provided for illustrative purposes only and may not be indicative of the future investment results or future portfolio composition. The composition, size of, and risks associated with an investment in the strategy may differ substantially from the examples set forth in this material. An investment can lose value.

Access products - If access products are held by the portfolio they may not be included in the calculation of characteristic data. Access products are instruments used to gain access to equity markets not otherwise available and may include (but are not limited to) instruments such as warrants, total return swaps, p-notes, or zero strike options. Actual holdings may vary.

Underlying Fund characteristics, positioning, and holdings shown herein are based on data for the Underlying Fund as at the specified date. Actual holdings may vary and there is no guarantee that the Underlying Fund will have the same characteristics as described herein. Please refer to the annual and semi-annual report for the full holdings.

Projected or forward looking characteristics - Projected or forward looking characteristics are based on a number of assumptions and the use of alternative assumptions could yield significantly different results. Additional information on this data is available upon request.

Active share/active weights - Active weights are the difference between the fund and benchmark weight. The differences are summed and divided by two to arrive at active share (active weight). The active weights may not sum to the total due to rounding. Totals may not add up to 100% due to rounding.

Source of data - Unless otherwise stated, the source of Wellington Management Funds (WMF) fund data is Wellington Management, and the source of index data is the index provider.

Turnover - Account Turnover is calculated by taking the lesser of total purchases or sales for the trailing 12-month period divided by the average month-end market value for the trailing 13-month period. The calculation may have exclusions, including but not limited to, cash and cash equivalents and certain derivatives.

Benchmarks shown for contextual purposes.

The investment objective for the Underlying Fund indicates the extent to which an index may be considered in the management of the Underlying Fund. Where a fund is not constructed relative to a benchmark, the index will serve as a reference benchmark and only shown for contextual purposes.

Additional disclosures:

Securities indices are unmanaged and are not subject to fees and expenses typically associated with managed accounts or investment funds. Investments cannot be made directly into an index.
