KKR Private Infrastructure (KIF) Fund (AUD)

31-August-2026

Innovative open-ended strategy that provides access to KKR's well-established infrastructure platform.

Underlying Fund portfolio update[1]

During August, the Underlying Fund's strategy has scaled into a diversified vehicle with 66 infrastructure holdings across US$8.01B in Net Asset Value. The Underlying Fund deployed ~US$580 million, into transportation, renewables, and data centre holdings.

Existing portfolio company updates:

As the Underlying Fund continues to mature, several of KKR's value creation initiatives are translating into tangible results across the portfolio. Recent developments across a diversified array of holdings highlight how the portfolio businesses are unlocking new revenue opportunities, accelerating growth investments, and scaling critical infrastructure platforms.

- **Atlantic Aviation** (Transportation) is the second-largest private aircraft fixed base operator ("FBO") platform globally, with 110+ locations across North America. Atlantic Aviation provides critical fuelling, hangar and terminal services to the private aviation market at capacity constrained, high traffic airports, supported by a weighted-average remaining ground lease life of ~23 years and a strong renewal track record.
- **SK-KKR Renewables JV** (Renewables) is one of Korea's largest renewables platforms, with a 2.7-gigawatt portfolio spanning solar, wind and fuel cell assets, helping South Korea meet its increasing demand for clean power to fuel digitalisation and industrialisation. Revenue is generated through corporate power purchase agreements, with a ~19 year remaining contract life.
- **STT GDC** (Data Centres) is a leading hyperscale focused data centre operator with 110+ assets across 12 global markets, holding leading positions in Singapore, the UK and India, and benefitting from strategic local partners and long-term customers. STT GDC's revenue is backed by 10-15 year leases, which includes fixed price escalators and full power cost pass throughs.

Underlying Fund summary:

As of 31 August 2026, the current portfolio of 66 assets provides both scale and diversification, offering investors exposure to key themes KKR are actively pursuing, including Renewables (18%), Waste (16%), Data Centres (11%), Transportation (8%), and Industrial Infrastructure (9%), along with other key sectors.

The performance data presented herein pertains specifically to the Class A units of the AUD Fund and is predicated on the month-end unit prices expressed in Australian Dollars. Net return of the AUD Fund has been calculated after the deduction of management fees and operating costs. Please note that these figures do not factor in the potential tax obligations at an individual investor level. The value of an investment can rise and fall and past performance is not a reliable indicator of future performance. The Net Asset Value is determined by subtracting AUD Fund liabilities from AUD Fund assets. All figures disclosed within this report are net of GST and RITC. Investors are reminded to seek independent financial advice before making investment decisions based on this performance data.
